**Programming** Charlotte E. Howell,2020 From the mid 90s to the present television drama with religious content has come to reflect the growing cultural divide between white middle America and concentrated urban elites As author Charlotte E Howell argues in this book by 2016 television narratives of white Christianity had become entirely disconnected from the religion they were meant to represent Programming labeled family friendly became a euphemism for white middlebrow America and developing audience niches became increasingly significant to serial dramatic television Utilizing original case

studies and interviews Divine Programming investigates the development writing producing marketing and positioning of key series including 7th Heaven Friday Night Lights Rectify Supernatural Jane the Virgin Daredevil and Preacher As this book shows there has historically been a deep ambivalence among television production cultures regarding religion and Christianity more specifically It illustrates how middle American television audiences lost significance within the Hollywood television industry and how this in turn has informed and continues to inform television programming on a larger scale In recent years upscale audience niches have aligned with the perceived tastes of affluent educated multicultural and importantly secular elites As a result the televised representation of white Christianity had to be othered and shifted into the unreality of fantastic genres to appeal to niche audiences To examine this effect Howell looks at religious representation through four approaches establishment distancing displacement and use and looks at series across a variety of genres and outlets in order to provide varied analyses of each theme

**Dark Nights, Bright Lights** Susanne Bach, Folkert Degenring, 2015-10-16 Light and darkness shape our perception of the world This is true in a literal sense but also metaphorically in theology philosophy literature and the arts the light of day signifies life safety knowledge and all that is good while the darkness of the night suggests death danger ignorance and evil A closer inspection however reveals that

things are not quite so clear cut and that light and darkness cannot be understood as simple binary opposites On a biological level for example daylight and darkness are inseparable factors in the calibration of our circadian rhythms and a lack of periodical darkness appears to be as contrary to health as a lack of exposure to sunlight On a cultural level too night and darkness are far from being universally condemnable in fiction drama and poetry the darkness of the night allows not only nightmares but also dreams it allows criminals to ply their trade and allows lovers to meet it allows the pursuit of pleasure as well as deep thought it allows metamorphoses transformations and transgressions unthinkable in the light of day But night is not merely darkness The night gains significance as an alternative space as an other of the day only when it is at least partially illuminated The volume examines the interconnection of night darkness and nocturnal illumination across a broad range of literary texts The individual essays examine historically specific light conditions in literature tracing the symbolic and metaphoric content of darkness and illumination and the attitudes towards them

Urban Evolutionary Biology Marta Szulkin, Jason Munshi-South, Anne Charmantier, 2020 Cities occupy about 3 per cent of the Earth's habitable land area and are home to one out of two humans worldwide both estimates are predicted to grow Urban space is thus becoming an important novel ecological niche for humans and wildlife alike Building on knowledge gathered by urban ecologists during the last half century evidence of evolutionary responses to urbanization has rapidly emerged Urban evolutionary biology is a nascent yet fast growing field of research and a fascinating testing ground for evolutionary biologists worldwide Urbanization offers a great range of opportunities to examine evolutionary processes because of the radically altered and easily quantifiable urban habitat and the large number of cities worldwide enabling rigorous replicated tests of evolutionary hypotheses Urban populations are increasingly exhibiting both neutral and adaptive evolutionary changes at levels ranging from genotypes to phenotypes The novelty of urban evolutionary biology is that these changes are driven by the cities we have built including effects of infrastructure pollution and social characteristics of our urban neighbourhoods It will thereby enrich the field of evolutionary biology with emergent yet incredibly potent new research themes where the urban habitat is key In a series of sixteen chapters written by leading evolutionary biologists working on urban drivers of evolution *Urban Evolutionary Biology* is the first academic book in the field It synthesizes current knowledge on evolutionary processes occurring literally on our
