Loveland, 2011-01-19 The Book of Consciousness by Dr Bara H Loveland Have you ever wondered what Consciousness is or the mind the unconscious or Archetypes and Symbols how they work and how to define these Without arriving at the reach of Consciousness there are numerous books on consciousness there are conferences held and groups searching for consciousness with dictionaries attempting to define it Why have they not found the ultimate definition of Consciousness to this day of the publication of The Book of Consciousness in January 2011 Could Bara s new book The Book of Consciousness hold the answer Can it deliver the ultimate in Consciousness There are many other questions which science has not positively answered yet Why is it that our brain cerebrum seat of the mind has to be calmed from 40 Hertz to 8 Hertz or less literally put to sleep in order to reach highest states of awareness although the cerebrum is supposed to be the seat of the world s highest intelligence Why is this seat of highest intelligence polluting the earth to the brink of dying of life Why is the unconscious called unconscious when it is able to construct meaningful dreams and is there a difference between an Archetype and a Symbol appearing in dreams and myths Could a neurosis not be a disease And what is it the mind really knows Profound contemplation of Consciousness must lead to further questions about the origins of Archetypes and Symbols about wisdom and similarities of ancient Stone Age Symbols East Indian and Egyptian scriptures Runes Mayan glyphs and biblical Symbols or world religions in general One may wonder why an Egyptian god is frequently named in Christian churches and is mentioned in both the Old and the New Testaments Is God He and could He exist Could there be a different world behind our visible one and could we have Bio Modulators to sense the other world What can we learn from a Germanic king Is it possible that we have more than five senses and how many diseases could naturally exist Can the DNA communicate and how many laws exist in the universe What is the meaning of certain Bible verses and what could have been the message Jesus gave the world on the cross Is New Age wisdom contained in the Bible and could it be that common science limits itself when excluding miracles it could perform with ease protecting the animals from harm Are there more levels of logic than one How could we realize or activate them What is the role our belief plays in our life and in science The Book of Consciousness begins where common science ends Be surprised by the innovative answers with some published about 30 years ago by this author Be captivated by the author s authentic new style by the

Hale, 2018-07-13 The Ancient Alien Theory Part Six and [ancientalienpedia.com](http://ancientalienpedia.com) are both a written and online resource The written guide serves as an opportunity to log out shut down and unplug from the online world The online guide serves as a gateway to the Ancient Alien Theory with links to online sources books and authors Just as Bill Birnes created The UFO Magazine Encyclopedia to provide a comprehensive guide to UFOs and extraterrestrial contact AncientAlienPedia is providing a database to the Ancient Alien Theory This all inclusive guidebook saves readers countless of hours of searching for this information which is scattered across hundreds of websites and books The AncientAlienPedia will prove to be an essential reference for the highly controversial Ancient Alien Theory [The Truth About Tesla](#) Christopher Cooper, 2018-10-02 Everything you think you know about Nikola Tesla is wrong The Truth About Tesla sets the record straight Nikola Tesla was one of the greatest electrical inventors who ever lived For years the engineering genius was relegated to relative obscurity his contributions to humanity we are told obscured by a number of nineteenth century inventors and industrialists who took credit for his work or stole his patents outright In recent years the historical record has been corrected and Tesla has been restored to his rightful place among historical luminaries like Thomas Edison George Westinghouse and Guglielmo Marconi Most biographies repeat the familiar account of Tesla's life including his invention of alternating current his falling out with Edison how he lost billions in patent royalties to Westinghouse and his fight to prove that Marconi stole 13 of his patents to invent radio But what really happened Consider this Everything you think you know about Nikola Tesla is wrong Newly uncovered information proves that the popular account of Tesla's life is itself very flawed In The Truth About Tesla Christopher Cooper sets out to prove that the conventional story not only oversimplifies history it denies credit to some of the true inventors behind many of the groundbreaking technologies now attributed to Tesla and perpetuates a misunderstanding about the process of innovation itself Are you positive that Alexander Graham Bell invented the telephone Are you sure the Wright Brothers were the first in flight Think again With a provocative foreword by Tesla biographer Marc J Seifer The Truth About Tesla is one of the first books to set the record straight tracing the origin of some of the greatest electrical inventions to a coterie of colorful characters that conventional history has all but forgotten *The Strange Life of Nikola Tesla* Nikola Tesla, 2020-09-28 The progressive development of man is vitally dependent on invention It is the most important product of his creative brain Its ultimate purpose is the complete mastery of mind over the material world the harnessing of the forces of nature to human needs This is the difficult task of the inventor who is often misunderstood and unrewarded But he finds ample compensation in the pleasing exercises of his powers and in the knowledge of being one of that exceptionally privileged class without whom the race would have long ago perished in the

bitter struggle against pitiless elements Speaking for myself I have already had more than my full measure of this exquisite enjoyment so much that for many years my life was little short of continuous rapture I am credited with being one of the hardest workers and perhaps I am if thought is the equivalent of labor for I have devoted to it almost all of my waking hours But if work is interpreted to be a definite performance in a specified time according to a rigid rule then I may be the worst of idlers Every effort under compulsion demands a sacrifice of life energy I never paid such a price On the contrary I have thrived on my thoughts In attempting to give a connected and faithful account of my activities in this story of my life I must dwell however reluctantly on the impressions of my youth and the circumstances and events which have been instrumental in determining my career Our first endeavors are purely instinctive promptings of an imagination vivid and undisciplined As we grow older reason asserts itself and we become more and more systematic and designing But those early impulses though not immediately productive are of the greatest moment and may shape our very destinies Indeed I feel now that had I understood and cultivated instead of suppressing them I would have added substantial value to my bequest to the world But not until I had attained manhood did I realize that I was an inventor This was due to a number of causes In the first place I had a brother who was gifted to an extraordinary degree one of those rare phenomena of mentality which biological investigation has failed to explain His premature death left my earth parents disconsolate I will explain my remark about my earth parents later We owned a horse which had been presented to us by a dear friend It was a magnificent animal of Arabian breed possessed of almost human intelligence and was cared for and petted by the whole family having on one occasion saved my dear father s life under remarkable circumstances My father had been called one winter night to perform an urgent duty and while crossing the mountains infested by wolves the horse became frightened and ran away throwing him violently to the ground It arrived home bleeding and exhausted but after the alarm was sounded immediately dashed off again returning to the spot and before the searching party were far on the way they were met by my father who had recovered consciousness and remounted not realizing that he had been lying in the snow for several hours This horse was responsible for my brother s injuries from which he died I witnessed the tragic scene and although so many years have elapsed since my visual impression of it has lost none of its force The recollection of his attainments made every effort of mine seem dull in comparison Anything I did that was creditable merely caused my parents to feel their loss more keenly So I grew up with little confidence in myself

*Tesla* Richard Munson, 2019-10-15 Tesla's inventions transformed our world and his visions have continued to inspire great minds for generations Nikola Tesla invented the radio robots and remote control His electric induction motors run our appliances and factories yet he has been largely overlooked by history In *Tesla* Richard Munson presents a comprehensive portrait of this farsighted and underappreciated mastermind When his first breakthrough alternating current the basis of the electric grid pitted him against Thomas Edison's direct current empire Tesla's superior technology prevailed Unfortunately he had little business sense and could not capitalize on this success His most advanced ideas went unrecognized for decades forty years in the case of the radio patent longer still for his ideas on laser beam technology Although penniless during his later years he never stopped imagining In the early 1900s he designed plans for cell phones the Internet death ray weapons and interstellar communications His ideas have lived on to shape the modern economy Who was this genius Drawing on letters technical notebooks and other primary sources Munson pieces together the magnificently bizarre personal life and mental habits of the enigmatic inventor Born during a lightning storm at midnight Tesla died alone in a New York City hotel He was an acute germaphobe who never shook hands and required nine napkins when he sat down to dinner Strikingly handsome and impeccably dressed he spoke eight languages and could recite entire books from memory Yet Tesla's most famous inventions were not the product of fastidiousness or linear thought but of a mind fueled by both the humanities and sciences he conceived the induction motor while walking through a park and reciting Goethe's *Faust* Tesla worked tirelessly to offer electric power to the world to introduce automatons that would reduce life's drudgery and to develop machines that might one day abolish war His story is a reminder that technology can transcend the marketplace and that profit is not the only motivation for invention This clear authoritative and highly readable biography takes account of all phases of Tesla's remarkable life
