Manufacturer: NIKON VISION CO., LTD.

1-20, Matsuda, Tokyo area (Nikon Sales Service, Japan) 1-40-0000, Japan

Product name: Bolt XR

Model name: Bolt XR

Congratulations on your choice of a Nikon Crossbow Scope. Your new scope is the finest example of Nikon's superb optical design and precision craftsmanship, important qualities for a serious crossbow hunter's scope. Whether you are hunting or target shooting, the procedure for mounting is identical. You should acquire a set of high quality mounting rings which have a standard diameter of 35.4 mm (1.4 inch). Follow the ring manufacturer's instructions for mounting procedure. After mounting the scope on your crossbow, follow the procedure for reticle alignment.

Caution

- Do NOT look at the sun through the crossbow scope. It will permanently damage your eyes. This precaution applies to all optical devices such as cameras and binoculars.
- Do NOT mount on any firearms since this is a crossbow scope.
- The crossbow scope is effectively sealed against moisture and dust. You may use your scope safely either in the rain or in dusty climates. To preserve the appearance of the scope, we suggest that it be dried and cleaned prior to storage. Use a soft cloth for cleaning metal surfaces and use photographic lens tissue to clean the scope lenses.

When setting the reticle for hunting, you should determine your standard range and then adjust the reticle based upon that target distance. For targets which vary from the standard distance you may simply adjust the position of the reticle elevation to your target, or you may wish to save the procedure for target shooting. You can also go to www.nikonusa.com for more information to complete, graph and enter your scope settings. It's up to your personal preference. We hope that you will enjoy your new Nikon crossbow scope for many years to come. Enjoy using it, and above all, always follow safe shooting procedures!

The product(s) described herein may be subject to export control regulations in the relevant country(ies). If (they) should not be exported without authorization of the exporting governmental authority(ies) the regulations apply.

Nikon Crossbow Scope Bolt XR

Instruction manual/Mode d'emploi

3. Instructions

(1) Focusing

- Look through the eyepiece with your eye positioned about 3 - 4 in (7.5 - 10cm) away from the eyepiece lens, and you will see the BDC 60 reticle.
- Be sure your eye is positioned within proper alignment and proper eye relief otherwise the view will "black out".
- Point the objective end of the scope at the sky (Do not point at the sun) or at a plain unpatterned wall.
- Turn the eyepiece adjustment (counter-clockwise) and then turn it clockwise until the reticle appears sharp.

(2) Adjustment of the crossbow scope

- Shooting through the crossbow scope, align the crossbow with your aiming point on the target and shoot a trial bolt. If the bolt does not hit the aiming point, adjust the elevation and windage, as follows:
- If the bolt hits under the aiming point, turn the elevation adjustment (counter-clockwise) in the direction of the arrow marked "U" for up.
 - If the bolt hits high, turn adjustment (clockwise) in the direction of the arrow marked "D" for down.
 - If the bolt hits to the right of the aiming point, turn the windage adjustment (clockwise) in the direction of the arrow marked "L" for left. If the bolt hits to the left of the aiming point, turn adjustment (counter-clockwise) in the direction of the arrow marked "R" for right.
 - After the reticle has been adjusted to the point of impact, replace adjustment cap both the windage and elevation knobs.

(3) Zero setting of scope ring

The adjustment ring has stop-up adjustment pins. After the reticle has been adjusted to the point of impact, for zero setting pull out the adjustment ring. The adjustment ring can turn freely now, and align the zero number to index line, then release the ring. It automatically retracts to the original position.

Waterproof Specification:

The crossbow scope is waterproof, and will suffer no damage to the optical system if submerged or dropped in water to a maximum depth of 1 meter for up to 30 minutes.

The crossbow scope offers the following advantages:

- Can be used in conditions of high humidity, dust and rain without risk of damage.
- Nitrogen-filled design makes it resistant to condensation and mold.

Observe the following when using the crossbow scope.

- It should not be operated in a field of running water.
- Any moisture should be wiped off before adjusting movable parts (adjustment knobs, eyepiece, etc.) of the crossbow scope to prevent damage and for safety reasons.

To keep your crossbow scope in excellent condition, Nikon Vision recommends regular servicing by an authorized dealer.

Note:

- The windage and elevation scales of the Bolt XR 3x32 are calibrated to move the point of impact 1/4 inch per click at 30 yards.

Maintenance

(1) Lens cleaning

To remove dirt or fingerprint, use glass or lens cleaning paper (silicon-free paper sold at camera shops) with a small quantity of absolute alcohol (available from drugstore) and lightly wipe off. Wiping with leather dusters is not recommended as it is liable to damage the lens surface. Do time to wash the lens surface on coarse the lens.

Brush dust off using a soft brush.

(2) Scope Exterior

Use a duster to wipe off any dirt or fingerprint that might accumulate. It is not necessary to oil the scope's surface.

(3) Windage/Elevation Adjustments

These adjustments are permanently lubricated. Do not attempt to lubricate them. Cover with a cap supplied, or apply the no oil setting, to keep dust out and dirt.

(4) Eyepiece Adjustment

This adjustment is permanently lubricated. Do not attempt to lubricate.
