The Hitchhiker's Guide to Going Wireless Arthur Goldstuck,2005 Trusted Systems Liquun Chen,Moti Yung,2010-07-10

This volume contains the 16 papers presented at the INTRUST 2009 conference held in Beijing China in December 2009. INTRUST 2009 was the first international conference on the theory, technologies and applications of trusted systems. It was devoted to all aspects of trusted computing systems including trusted modules, platforms, networks, services and applications from their fundamental features and functionalities to design principles, architecture and implementation technologies. The goal of the conference was to bring academic and industrial researchers, designers and implementers together with end users of trusted systems in order to foster the exchange of ideas in this challenging and fruitful area. The program consisted of 3 invited talks and 20 contributed papers. The invited speakers were Wenchang Shi, Renmin University of China; David Wooten, Microsoft; and Scott Rotondo, Sun Microsystems. The first speaker provided a paper which is included in these proceedings. Special thanks are due to these speakers. The contributed talks were arranged with two main tracks: one devoted to academic aspects of trusted computing systems addressed by these proceedings and the other devoted to industrial aspects. The contributed papers were selected out of 42 submissions from 13 countries. The refereeing process was rigorous, involving at least three and mostly more independent reports being prepared for each submission. We are very grateful to our hard working and distinguished Program Committee for doing such an excellent job in a timely fashion. *HWM*, 2005-07. Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

The Hitchhiker's Guide to Going Mobile Arthur Goldstuck,2006. The Hitchhiker's Guide to Going Wireless quickly established itself as the essential guide to mobile technology in South Africa. Going Mobile starts where Wireless left off and shows how the vision for the future is becoming a reality today. Wireless talked about the future high speed wireless technology called WiMax and already WiMax services are being offered commercially. The future is rushing up on us so fast that the time for a new edition of the Hitchhiker's Guide is now. As in Wireless we ask the critical questions: What does it all mean? Where is it all going? How do ordinary people tap into this communication revolution? Here is a guide that once again catches the wave of interest and activity that taps into the buzz and also sets the mobile agenda for ordinary people and businesses throughout South Africa. **Automated Deduction - CADE-20** Robert Nieuwenhuis,2005-08-25. This volume contains the proceedings of the 20th International Conference on Automated Deduction, CADE 20. It was held July 22-27, 2005 in Tallinn, Estonia.
