Contemporary Swim Start Research Sebastian Fischer, Armin Kibele, 2017-12-01 This conference book includes contemporary reports and corresponding studies on swim starts conducted by young scientists from around the world The various topics relate to individual starts from the block backstroke starts and relay starts highlighting different aspects and phases of the corresponding movement behavior Most of the reports published in this book have been presented during the 2015 Young Experts Workshop of Swim Start Research supported by the Federal Institute of Sport Science in Germany **A Practical Guide to Price Index and Hedonic Techniques** Ana M. Aizcorbe, 2014-06-12 This book provides an accessible guide to price index and hedonic techniques with a focus on how to best apply these techniques and interpret the resulting

measures One goal of this book is to provide first hand experience at constructing these measures with guidance on practical issues such as what the ideal data would look like and how best to construct these measures when the data are less than ideal A related objective is to fill the wide gulf between the necessarily simplistic elementary treatments in textbooks and the very complex discussions found in the theoretical and empirical measurement literature Here the theoretical results are summarized in an intuitive way and their numerical importance is illustrated using data and results from existing studies Finally while the aim of much of the existing literature is to better understand official price indexes like the Consumer Price Index the emphasis here is more practical to provide the needed tools for individuals to apply these techniques on their own As new datasets become increasingly accessible tools like these will be needed to obtain summary price measures Indeed these techniques have been applied for years in antitrust cases that involve pricing where economic experts typically have access to large granular datasets
