methods of production and new class relationships He argues this conflict appears in every country as national economies realigned to fit new patterns of world accumulation creating a host of political tensions within and between nations This analysis is detailed in a distinctive interpretation of the US military industrial complex as well as the contemporary class struggles in Germany and the emerging powers of China India and Brazil The book concludes by investigating alternative trends which are currently challenging the inequalities of global capitalism unfolding a fresh approach to the relationship between the state market and civil society
