A Minor Revolution Adam Benforado, 2023-02-07 A revelatory investigation into how America is failing its children and an urgent manifesto on why helping them is the best way to improve all of our lives from the New York Times bestselling author of *Unfair The New Science of Criminal Injustice* Compelling an extremely sympathetic and worthy attempt to protect kids Benforado has written a book that reads like a manifesto His ideas are bold to the point and ambitious The Atlantic At the dawn of the twentieth century a bright new age for children appeared on the horizon with progress on ending child labor providing public education combating indigence promoting wellness and creating a juvenile justice system But a hundred years on the promised light has not arrived Today more than eleven million American children live in poverty and more than four million lack health insurance Each year we prosecute thousands of kids as adults while our schools crumble We deny young people any political power while we fail to act on the issues that matter most to them racism inequality and climate change Through unforgettable stories law professor Adam Benforado draws a vivid portrait of our neglect We are there when Ariel is placed in an orphanage after her parents are locked away for transporting marijuana when Harold first gazes in disbelief upon the immaculate lawn of an elite private school after a childhood of asphalt play yards when Wylie is hit with a paddle by his public school principal as punishment for taking a moment of silence to protest gun violence When Tyler runs for governor at age seventeen we are also there to witness the extraordinary capacities of young people Our disregard for children's rights is not simply a moral problem it's also an economic and social one The root cause of nearly every major challenge we face from crime to poor health to unemployment can be found in our mistreatment of kids But in that sobering truth is also the key to changing our fate as a nation Drawing on the latest research on the value of early intervention investment and empowerment *A Minor Revolution* makes the urgent case for putting children first in our budgets and policies in how we develop products and enact laws and in our families and communities Childhood is the window of opportunity for all of us

Dinesh Singh Thakur, Prashant Reddy Thikkavarapu, 2022-10-10 Since 2004 when the fraud at Ranbaxy the largest Indian pharmaceutical company at the time first came to light the Indian pharmaceutical industry and clinical research organizations have been rocked by a series of scandals after investigations by American and European drug regulators While the West has responded to concerns about quality of Made in India medicine by blocking exports from many Indian pharmaceutical companies the Indian government responded not with regulatory reform but conspiracy theories about vested interests working against India More worryingly the Indian state has also turned a blind eye to a far more serious

quality crisis in its domestic pharmaceutical market At times these quality issues manifest themselves in the deaths of Indian citizens as happened in early 2020 when 11 children died in Jammu because of adulterated cough syrup On other occasions a dodgy drug approval process has led to the Indian regulator approving sales of drugs that have never been approved by regulators in the developed markets The result is not just poor health outcomes but outsize profits for pharmaceutical companies manufacturing medicines that have never been validated through scientifically rigorous clinical trials for therapeutic evidence These twin crises in both the domestic and export markets is because India has either outdated regulations or no regulations in some areas Even the outdated regulations are enforced with kids gloves by drug inspectors and judicial magistrates who are ready to forgive even those whose drugs are found to contain barely any active ingredient or dangerously high levels of bacterial endotoxins In a race for growth of the pharmaceutical industry the Indian state has sacrificed scientific rigour and ignored the basic principles of public health Given India s position as the pharmacy of the developing world the failure of the Indian state is a problem for not just India but most of the developing world This timely important and compelling book based on deep research questions and analyzes the actions of the institutions that are responsible for the safety and efficacy of the Indian drug supply in the context of the historical evolution of the Drugs Act 1940 from pre Independence India to the present day The future of Indian public health lies in responding to the issues raised in this book

The Future of the Professions Richard Susskind, Daniel Susskind, 2022-03-31 This book predicts the decline of today s professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today s professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century

Unheard Witness Jo Scott-Coe, 2023-10-17 Written for a general audience this book taps into and reorients the narrative of the 1966 UT Tower shooting the first mass campus shooting to a person and side of this crime that have been too long overlooked Kathy Leissner Whitman who was married to

the Tower shooter This book explores Kathy s experience with domestic violence at the hands of the shooter Charles Whitman and her murder as well as the murder of Kathy s mother in law the night before his rampage Scott Coe uses Kathy s letters which have not been available until now to her husband and family to craft a biography that provides a rare glimpse of how one woman expressed and sought to change her life with a coercive and sometimes violent partner during a time when domestic abuse and mass shooting were not part of our vocabulary She traces Kathy s life focusing on the years she spent with Whitman from their whirlwind courtship in her first year at UT through her graduation and beginnings of a career as a teacher despite domestic turmoil up to the last weeks before her death at age 23 In doing so Scott Coe challenges assumptions about Kathy and Charles that have been baked into this story and more broadly about how intimate partners should respond to domestic violence Kathy s story is framed by an introduction and conclusion that place this tragedy in the context of the largely invisible epidemic of domestic abuse in the United States and the link between mass shootings and violence against women in the home

Dying of Whiteness Jonathan M. The Ideas Industry Daniel W. Drezner, 2017-03-01 The public intellectual has a long and storied history Previously the public intellectual was always expected to opine on a broad array of topics from foreign policy to economics Yet in recent years a new kind of thinker has supplanted that archetype the thought leader Equipped with one big idea thought leaders focus their energies on TED talks rather than highbrow periodicals In contrast to public intellectuals thought leaders gain fame as single idea merchants Their ideas are often laudable and highly ambitious but they often work through institutions that are closed to the public and less open to criticism In The Ideas Industry Daniel W Drezner explains how this shift happened pointing to the roles of political polarization heightened inequality and eroding trust in authority In contrast to their predecessors today s intellectuals are more likely to enjoy the support of ideologically friendly private funders and be housed in ideologically driven think tanks Increasing inequality is also a key driver of this shift more than ever before contemporary plutocrats fund intellectuals and idea factories that generate arguments that align with their own Finally the erosion of trust in experts has lowered the

barriers of entry in the marketplace of ideas But while there are certainly some downsides to the contemporary ideas industry Drezner argues that it is very good at broadcasting ideas widely and reaching large audiences hungry for new thinking Both fair minded and trenchant The Ideas Industry reshapes our understanding of contemporary public intellectual life in America and the West *Introducing Public Administration* Jay M. Forced Marriage and 'Honour' Killings in Britain Christina Julios, 2016-03-09 This book explores the contemporary phenomenon of forced marriage and honour killings in Britain Set against a background of increasing honour based violence within the country s South Asian and Muslim Diasporas the book traces the development of the honour question over the past two decades It accordingly witnesses unprecedented changes in public awareness and government policy including groundbreaking honour specific legislation and the criminalisation of forced marriage All of which makes Britain an important context for the study of this now indigenous and self perpetuating social problem In considering the scale of the challenge
