Communicating Science and Engineering Data in the Information Age National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Communicating National Science Foundation Science and Engineering

Information to Data Users,2012-02-07 The National Center for Science and Engineering Statistics NCSES of the National Science Foundation NSF communicates its science and engineering S E information to data users in a very fluid environment that is undergoing modernization at a pace at which data producer dissemination practices protocols and technologies on one hand and user demands and capabilities on the other are changing faster than the agency has been able to accommodate NCSES asked the Committee on National Statistics and the Computer Science and Telecommunications Board of the National Research Council to form a panel to review the NCSES communication and dissemination program that is concerned with the collection and distribution of information on science and engineering and to recommend future directions for the program Communicating Science and Engineering Data in the Information Age includes recommendations to improve NCSES s dissemination program and improve data user engagement This report includes recommendations such as NCSES s transition to a dissemination framework that emphasizes database management rather than data presentation and that NCSES analyze the results of its initial online consumer survey and refine it over time The implementation of the report s recommendations should be undertaken within an overall framework that accords priority to the basic quality of the data and the fundamentals of dissemination then to significant enhancements that are achievable in the short term while laying the groundwork for other long term improvements

Aging and the Macroeconomy National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Population,Division on Engineering and Physical Sciences,Board on Mathematical Sciences and Their Applications,Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population,2013-01-10 The United States is in the midst of a major demographic shift In the coming decades people aged 65 and over will make up an increasingly large percentage of the population The ratio of people aged 65 to people aged 20 64 will rise by 80% This shift is happening for two reasons people are living longer and many couples are choosing to have fewer children and to have those children somewhat later in life The resulting demographic shift will present the nation with economic challenges both to absorb the costs and to leverage the benefits of an aging population Aging and the Macroeconomy Long Term Implications of an Older Population presents the fundamental factors driving the aging of the U S population as well as its societal implications and likely long term macroeconomic effects in a global context The report finds that while population aging does not pose an insurmountable challenge to the nation it is imperative that sensible policies are implemented soon to allow companies and households to respond It offers four practical approaches for preparing resources to support the future consumption of households and for adapting to the new economic landscape

Renewable Energy Applications for Freshwater Production Jochen Bundschuh,Jan Hoinkis,2012-07-02 Worldwide many regions have a great potential to cover part of their pressing water needs by renewable energy powered water treatment processes using either thermal or membrane based technologies Not only arid and semiarid regions are increasingly suffering from water shortage but also many other regions face a limitation of freshwater resources either by increasing contamination of surface water

bodies or groundwater resources unsuitable for drinking and irrigation purposes either due to their high grade of mineralization or their contents of toxic components In many areas without centralized water supply treatment techniques using locally available renewable energy resources such as wind solar and geothermal can provide an economical social and environmentally sustainable option for clean water production from seawater and from highly mineralized or otherwise unsuitable ground and surface water This book provides an overview on possible cost efficient techniques and application opportunities for different scales and shows why the implementation of these technologies faces numerous technological economic and policy barriers and provides suggestions how they can be overcome It serves as a synoptic compendium of the fundamentals of freshwater production using renewable energies applicable to all types of water ranging from brackish to marine water and also including industrial and communal residual water The book is aimed at professionals academics and decision makers worldwide working in the areas of water resources water supply land planning energy planning greenhouse gases emission mitigation and rural development

An Informed Cosmos Peter S. Williams, 2023-07-14 After a substantial author's preface recounting the author's life journey with the question of science and design in nature *An Informed Cosmos* pulls together essays that jointly cover the core arguments for a scientific theory of intelligent design Along with a foreword by philosopher of science and leading design theorist Stephen C Meyer and a wide range of recommended resources *An Informed Cosmos* offers an informed overview of the contemporary case for intelligent design

Reimagining Intervention in Young Lives Karen R. Foster, Dale C. Spencer, 2012-08-10 Poverty and unemployment are on the rise among Canadian youth *Reimagining Intervention in Young Lives* looks at the issue from the perspective of those most affected revealing the difficulties young people encounter with the support system In depth interviews with forty five young people in Ottawa reveal that solutions do exist predicated on recognition that the problem lies not with incorrigible youth but with a social aid structure that imposes barriers to success Intervention is necessary argue the authors but not so much in the lives of young people as in the faulty structures that incorrectly presume how they interpret risk poverty and their own potential

Climate Change from the Streets Michael Méndez, 2020-01-07 An urgent and timely story of the contentious politics of incorporating environmental justice into global climate change policy Although the science of climate change is clear policy decisions about how to respond to its effects remain contentious Even when such decisions claim to be guided by objective knowledge they are made and implemented through political institutions and relationships and all the competing interests and power struggles that this implies Michael Méndez tells a timely story of people place and power in the context of climate change and inequality He explores the perspectives and influence low income people of color bring to their advocacy work on climate change In California activist groups have galvanized behind issues such as air pollution poverty alleviation and green jobs to advance equitable climate solutions at the local state and global levels Arguing that environmental protection and improving public health are inextricably linked Méndez contends that we must incorporate local knowledge culture and

history into policymaking to fully address the global complexities of climate change and the real threats facing our local communities

Improving Energy Decisions Bert

Droste-Franke, M. Carrier, M. Kaiser, Miranda Schreurs, Christoph Weber, Thomas Ziesemer, 2014-11-01 Managing a successful transition of the current energy supply system to less carbon emitting options ensuring a safe and secure supply during the whole process and in the long term is one of the largest challenges of our time Various approaches and first implementations show that it is not only technological issue but also a matter of societal acceptance and acceptability considering basic ethic values of the society The main foci of the book are thus to develop an understanding about the specific challenges of the scientific policy advice in the area to explore typical current approaches for the analysis of future energy systems and to develop criteria for the quality assessment and guidelines for the improvement of such studies The book provides assistance to the interpretation of existing studies and guidelines for setting up and carrying out new analyses as well as for communicating and applying the results Thereby it aims to support the involved actors such as the respective scientific experts and researchers as well as decision makers energy suppliers stakeholders and the interested public in designing procedures for a successful transition process The study elaborates consistent interdisciplinary advice as contribution for realising a continuously safe and secure long term viable energy supply in spite of diverse interests multi level

responsibilities multi dimensional processes large uncertainties and lack of knowledge about future developments

Pastoralism and Development in Africa Andy Catley,Ian Scoones,Jeremy Lind,2013 Once again the Horn of Africa has been in the headlines And once again the news has been bad drought famine conflict hunger suffering and death The finger of blame has been pointed in numerous directions to the changing climate to environmental degradation to overpopulation to geopolitics and conflict to aid agency failures and more But it is not all disaster and catastrophe Many successful development efforts at the margins often remain hidden informal sometimes illegal and rarely in line with standard development prescriptions If we shift our gaze from the capital cities to the regional centres and their hinterlands then a very different perspective emerges These are the places where pastoralists live They have for centuries struggled with drought conflict and famine They are resourceful entrepreneurial and innovative peoples Yet they have been ignored and marginalised by the states that control their territory and the development agencies who are supposed to help them This book argues that while we should not ignore the profound difficulties of creating secure livelihoods in the Greater Horn of Africa there is much to be learned from development successes large and small This book will be of great interest to students and scholars with an interest in development studies and human geography with a particular emphasis on Africa It will also appeal to development policy makers and practitioners
