## **November 2013 Economics Environment:**

**Environmental Challenges and Governance** Sacchidananda Mukherjee, Debashis Chakraborty, 2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades. While growth considerations have paved ways for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources, focus on environmental sustainability has been a recent consideration. The growth impetus still playing a key role in these economies, it becomes imperative that the countries effectively address the key sustainability concerns e.g. air and water pollution, land degradation, loss of biodiversity, climate change issues like CO<sub>2</sub> emissions etc. But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary, presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges? The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia. A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan, South Korea, upper middle China, Malaysia, developing India, Indonesia, Philippines, Sri Lanka, Thailand and least developed countries Bangladesh, Myanmar, Nepal. **Sport**

**Management and the Natural Environment** Jonathan Casper, Michael Pfahl, 2015-05-01 With climate change and other environmental issues becoming increasingly prominent, any successful sport organization now has to incorporate environmental concerns into their business strategy while all sport managers must understand how to implement environmental initiatives into their everyday business. *Sport Management and the Natural Environment* is the first book to introduce environmental theory and best practice in the context of sport management, demonstrating how sport organizations can become more effective and sustainable and exploring the important advocacy role that sport organizations have in local and global communities. It considers the unique social, economic and political space that sport occupies in society and examines the most important practical managerial issues related to sport and the environment including Facilities, Finance and accounting, Leadership, Marketing, communication and digital media, Operations, Stakeholder relations, Strategic planning. Including contributions from leading academics and practitioners, *Sport Management and the Natural Environment* is the perfect foundation text for any course touching on environmental issues or social responsibility in sport and essential reading for any sport manager looking to improve their professional practice. *Resurgent Resource Nationalism* Mapungubwe Institute for Strategic Reflection (MISTRA), 2016-02-15 The period between 2001 and 2008 saw the longest commodities boom in recent history. Resource rich countries across the world developed more interest in the profits, control and ownership of their natural resources. South Africa, which did not benefit much from the boom in commodity prices, was nonetheless affected by the emergent resource nationalism trend and it became the focus of the governing party's 2010 National General

Council which ultimately resulted in the constitution of a committee to review the country's policy and legislative framework regarding natural wealth beneath the soil. Although the resurgence of resource nationalism is a recent phenomenon, the idea of state intervention in the economy and the extractive sector in particular is not new. Resurgent Resource Nationalism is a qualitative study undertaken by MISTRA for SASOL Ltd that looks at the resurgence of resource nationalism over the past ten years. It discusses the concept of resource nationalism and its manifestation in public policy. It identifies the concerns, drivers and instruments through which resource nationalism is pursued by various mining jurisdictions across regions. It deliberately focuses more on the hydrocarbons sector in order to suit the target audience. The aim is to observe macro trends emerging in various regions of the world and explore how best private actors can respond to the various forms of resource nationalism.

The Urban Struggle for Economic, Environmental and Social Justice Malo André Hutson, 2015-11-19. This book discusses the current demographic shifts of blacks, Latinos and other people of colour out of certain strong market cities and the growing fear of displacement among low income urban residents. It documents these populations' efforts to remain in their communities and highlights how this leads to community organizing around economic, environmental and social justice. The book shows how residents of once neglected urban communities are standing up to city economic development agencies, influential real estate developers, universities and others to remain in their neighbourhoods, protect their interests and transform their communities into sustainable, healthy communities. These communities are deploying new strategies that build off of past struggles over urban renewal. Based on seven years of research, this book draws on a wealth of material to conduct a case study analysis of eight low income mixed income communities in Boston, New York, San Francisco and Washington DC. This timely book is aimed at researchers and postgraduate students interested in urban policy and politics, community development, urban studies, environmental justice, urban public health, sociology, community based research methods and urban planning theory and practice. It will also be of interest to policy makers, community activists and the private sector.

*OECD Environmental Performance Reviews: Spain 2015* OECD, 2015-03-02. This report evaluates Spain's progress towards sustainable development and green growth with a focus on biodiversity and the environmental performance of the private sector.

*The Politics of EU-China Economic Relations* John Farnell, Paul Irwin Crookes, 2016-09-23. This book examines the political factors in the economic relationship between the European Union and China that help to explain the apparent stalling of the EU-China strategic partnership in policy terms. Written by two specialists with long experience of EU-China relations, this new volume draws on the latest research on how each side has emerged from the economic crisis and argues that promising potential for EU-China cooperation is being repeatedly undermined by political obstacles on both sides. The work is designed to be an analysis useful for university faculty and students interested in China and the European Union as well as for the general reader, providing an empirically led examination that is academically informed and yet also approachable. Dissecting key policy areas such as trade, research and innovation, investment and monetary affairs, the

conclusion offers a compelling prognosis of how the EU China relationship might develop over the coming years

Ecological economics C.M. van der Heide, W.J.M. Heijman, J.H.J. Schaminee, 2025-07-21 A textbook about the nature of economics and the economics of nature Is economic growth the cause of or the solution for biodiversity loss Why do we keep drilling for oil and gas when green energy sources are cheaper And is it possible to protect nature without government intervention The answer to these and other questions lies in economic knowledge But in an age when the boundaries between nature and society are becoming increasingly vague ecology and economics are still worlds apart Not only should economists find out more about ecology ecologists should acquire a better understanding of economic principles and concepts from Adam Smith's invisible hand to the Gini coefficient and from diminishing marginal utility to the Hedonic Pricing method The aim of this book is to provide students with knowledge and an understanding of economic science and to offer them a mindset for tackling the important ecological issues of our time The book demonstrates that economic theories are sometimes part of an ecological problem but can also offer valuable insights in the search for a solution The textbook is intended for use on ecology courses at institutes for professional education and on science courses A strange combination at first glance but having read this book I am convinced of the inextricable link between ecology and economics This book is an eye opener not just for professional and science students but also for policymakers and land managers My interest increased with every page and my knowledge about the interfaces and connections between two interesting disciplines grew considerably Hans van Rooijen Former director of Woodland and Nature Conservation course Hogeschool Van Hall Larenstein the Netherlands Old fashioned administrators and economists have a tendency to regard economics and ecology as counter forces And many nature conservationists don't think that nature should be discussed in terms of economic utility In all honesty both visions are fairly blinkered It goes without saying that nature has a value in itself which is why Natuurmonumenten has worked in this area for more than 110 years But nature also has economic significance and needn't be an obstacle to economic development It can even be an economic multiplier The thinking around synergies between economics and ecology must be intensified to make the world a better place This book can only help Marc van den Tweel Chief Executive Natuurmonumenten Dutch conservation organisation the Netherlands

### **Economic Aspects of the Sustainability**

**Transition in Europe** Rosa Maria Fernandez Martin, 2024-12-31 This book comprehensively examines the financial and economic aspects of the sustainability transitions demanded by the primary components of the European Green Deal It asks how the EU has been dealing with the allocation of resources to foster the sustainability transition how the additional transformations required by the climate emergency will be financed and which actors businesses governments citizens will pay and how Looking at how the EU has been managing this over time through changes in the Environment Action Programmes Structural Funds or the Multiannual Financial Framework this book examines policy priorities and analyses the different instruments proposed as part of this evolving context including market support instruments for renewable energies and the creation of new instruments such as Climate Awareness Bonds It also highlights new developments such as the debate on the role of environmental taxes or the uneven development across Member States of green financial instruments This book presents an evolving puzzle into the limited possibilities of the EU to deploy resources that contribute to the overarching goal of achieving a low carbon economy and illustrates the need for acceptance towards changes and compromises that are required from all affected stakeholders This book will be of key interest to scholars students and practitioners of sustainable development climate governance and EU politics and more broadly to those working on European Studies economics politics international relations or public policy

**The 2010 Pakistan Floods: Environmental and Economic Impact**, 2015-04-15 Pakistan is a developing country of the Monsoon Asia with dense concentration of population in the plain areas of the Indus and other rivers Due to its unique geographical setting it is prone to various natural disasters including floods There is a whole trail of death and destruction left behind by devastating floods But the 2010 floods in the country were unprecedented because of their vast areal coverage loss of thousands of lives and large scale destruction This study is an analysis of the impact of the 2010 floods on the environment and economy of Pakistan The study begins with the environmental characteristics of the study area to understand the drainage water availability and flooding patterns in different parts of the country Then a study of the flood history of Pakistan has been undertaken to identify possible causes of floods rescue and management operations and preparedness for the future The immediate damage and losses to the environment and economy have been separately studied followed by the impact of the floods resulting from widespread damages to the different sectors of the economy and environment The study reveals that the floods had a severe impact on the habitat ecology and lives of thousands of animals in the country The actual impact on the environment was so vast and far reaching that it is difficult to comprehend and express it in numerical terms Therefore in the study it has also been argued that loss of buildings infrastructure and agriculture is actually a loss of environment All sectors of the economy were affected by the floods but agriculture housing and transport and communication sectors were severely hit and had brought the whole country to a standstill Rescue and rehabilitation efforts carried out with the help of international cooperation achieved some

degree of success But for the future Pakistan has to take many physical organisational and technological measures to deal effectively with natural disasters including floods There are many lessons to be learnt from the disastrous 2010 floods and hopefully this study will be useful in that direction

**Sustainability and Management** Kıymet Çalıyurt,Ülkü Yüksel,2017-07-14 In the wake of the 1987 Brundtland Report sustainable development has become key to the management systems within businesses and a means by which companies can increase their long term value Being a sustainable company increasingly means staying alive in business and has become a necessity for all kinds of enterprises from the micro sized to global corporations In more recent years many companies and indeed governments have looked at sustainability as a means to combat the multiple challenges of environmental accidents global warming resource depletion energy poverty and pollution However being sustainable or maintaining sustainability is not an easy task for a company s management function It needs continuous support and engagement from the board the executive management staff and other stakeholders alike Additionally it brings extra costs to the company in terms of hiring trained staff organising continuous training in the company publishing sustainability reports and subscribing to a rating system Sustainability must be nourished by a company s board as well as by all of its departments such as accounting marketing and human resources By the same token it is not enough for a company simply to declare itself a sustainable business or rely on past measures and reputation sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports according to international rating systems In *Sustainability and Management An International Perspective* K ymet al yurt and lk Y ksel bring together international authors from a variety of specialisations to discuss the development aspects problems roadmap trends and disclosure systems for sustainability in management The result is a lively insightful exposition of the field

**Environmental Change and the World's Futures** Jonathan Paul Marshall,Linda H. Connor,2015-08-27 Climate change and ecological instability have the potential to disrupt human societies and their futures Cultural social and ethical life in all societies is directed towards a future that can never be observed and never be directly acted upon and yet is always interacting with us Thinking and acting towards the future involves efforts of imagination that are linked to our sense of being in the world and the ecological pressures we experience The three key ideas of this book ecologies ontologies and mythologies help us understand the ways people in many different societies attempt to predict and shape their futures Each chapter places a different emphasis on the linked domains of environmental change embodied experience myth and fantasy politics technology and intellectual reflection in relation to imagined futures The diverse geographic scope of the chapters includes rural Nepal the islands of the Pacific Ocean Sweden coastal Scotland North America and remote rural and urban Australia This book will appeal to researchers and students in anthropology sociology environmental studies cultural studies psychology and politics

*Environmental Software Systems. Infrastructures, Services and Applications* Ralf Denzer,Robert M. Argent,Gerald Schimak,Jiří Hřebíček,2015-02-09 This book constitutes the refereed proceedings of the 11th IFIP WG 5.11 International

Symposium on Environmental Software Systems ISESS 2015 held in Melbourne Australia in March 2015 The 62 revised full papers presented were carefully reviewed and selected from 104 submissions The papers are organized in the following topical sections information systems information modeling and semantics decision support tools and systems modelling and simulation systems architectures infrastructures platforms and services requirements software engineering and software tools analytics and visualization and high performance computing and big data Saving the Future Alex Otti, 2016-06-15 Saving the Future is an urgent wake up call to a new generation of leaders to rise to the historic challenge to save Nigeria and to retreat from the wasteful destructive trajectory we have stumbled along over the decades It is filled with golden nuggets of insights from the world of business high finance and economic science It diagnoses Nigerias manifold national maladies as corruption waste poor governance failure of the rule of law the infrastructure deficit weak property rights and the poor business environment The author demonstrates an uncommon understanding of world economics and the structural parameters of 21st century integrated digital industrial civilization He strongly believes that if the right things are done to put the house in order the future of Nigeria can still be saved **Research Handbook on Climate Governance** Karin Bäckstrand, Eva Lövbrand, 2015-11-27 The 2009 United Nations climate conference in Copenhagen is often represented as a watershed in global climate politics when the diplomatic efforts to negotiate a successor agreement to the Kyoto Protocol failed and was replaced by a fragmented and decentralized climate governance order In the post Copenhagen landscape the top down universal approach to climate governance has gradually given way to a more complex hybrid and dispersed political landscape involving multiple actors arenas and sites The Handbook contains contributions from more than 50 internationally leading scholars and explores the latest trends and theoretical developments of the climate governance scholarship

**African Economic Outlook 2014 Global Value Chains and Africa's Industrialisation** African Development Bank, OECD, United Nations Development Programme, 2014-05-19 The African Economic Outlook 2014 analyses the continent's growing role in the world economy and predicts two year macroeconomic prospects It details the performance of African economies in crucial areas System of Environmental-Economic Accounting for Agriculture, Forestry and Fisheries (SEEA AFF) Food and Agriculture Organization of the United Nations, United Nations Statistics Division, 2020-04-01 The System of Environmental Economic Accounting for Agriculture Forestry and Fisheries SEEA AFF is a statistical framework that facilitates description and analysis of agriculture forestry and fisheries as economic activities and their relationship with the environment It extends to these primary sectors the environmental economic structure and principles of the System of Environmental Economic Accounting Central Framework SEEA CF an official UN statistical standard The SEEA AFF defines core national accounting tables easily integrated into synthetic view tables provided as a basis for the measurement and reporting of information on physical and monetary assets and flows accounts on natural resource use production trade and consumption of food and other agricultural products It thus offers countries a robust statistical structure for the development

of agri environmental indicators including SDGs which can be monitored in a transparent coherent and internationally comparable manner

**International Boundaries in a Global Era** Lawrence Herzog, Keith J Hayward, 2017-10-02 As we move deeper into the twenty first century the forces of globalisation continue to transform both the spaces around international borders and the social processes cultural practices economies and political dynamics within and between these spaces The geographies of border regions have undergone a dramatic transformation over the last half century nation state boundaries growing ever more porous in many though not all areas of the planet Global trade has become an accepted norm in business transactions almost everywhere Coupled with the revolution in digital technology the era of globalisation promises to continue to challenge old ideas with new approaches to understanding international boundaries and the regions they impact All of the chapters in this book mainly drawn from the US Mexico border with comparisons to Europe speak to the ways in which border regions have become important places in their own right spaces where people live work and create art where corporations invest where crimes occur and where security remains a concern They are therefore spaces that need to be better understood and managed especially in light of the cross national and global forces impinging upon them This book was originally published as a special issue of *Global Society*

**An Introduction to the Green Economy** Adrian C. Newton, Elena Cantarello, 2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to

strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy
