

Abstract: This paper examines the effects of the 1997-1998 Asian financial crisis on the export performance of the manufacturing sector in the Philippines. The paper finds that the crisis had a significant negative impact on the export performance of the manufacturing sector. The impact was more pronounced for the export of capital goods and intermediate goods. The paper also finds that the impact of the crisis was more pronounced for the export of goods from the manufacturing sector than for the export of goods from the services sector. The paper suggests that the government should take measures to support the export performance of the manufacturing sector during times of crisis.
