Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

White, 2022-12-27 This book argues that the moral quality of an act comes from the agent's inner states. By arguing for the indispensable relevance of intention in the moral evaluation of acts, the book moves against a mainstream objective approach in normative ethics. It is commonly held that the intentions, knowledge, and volition of agents are irrelevant to the moral permissibility of their acts. This book stresses that the capacities of agency, rather than simply the label agent, must be engaged during an act if its moral evaluation is to be coherent. The author begins with an ontological argument that an act is a motion or a causing of change in something else. He argues that the source of an act's moral meaning is in the agent, specifically what the agent is aware of relevant facts around her aims to accomplish. He then moves to a series of critical chapters that consider arguments for mainstream approaches to act evaluation, including Thomson's dismissal of the agent's knowledge and volition requirements, Scanlon's arguments for a derivative relevance of intentions to permissibility, Frowe's causal roles of agents in the moral evaluation of acts, and Bennett's explicit defense of the objective approach. The book concludes by offering the author's preferred replacement for the objective approach: an Aristotelian Thomist view of acts. *Acts, Intentions, and Moral Evaluation* will be of interest to scholars and advanced students working in ethics, just war theory, the ethics of self-defense, and philosophy of action *Cardiac Arrhythmia Management* Angela Tsiperfal, Linda K.
