

7K Forces - Revision Spread

Different Forces

Define what a force is.

A force is a push or a pull.

What is the unit of force?

Newton (N)

How do we represent forces?

With arrows.

Explain the difference between contact and non-contact forces, giving examples for each.

Contact force - a force where there needs to be contact between objects, e.g. friction.

Non-contact force - a force that can affect something from a distance, e.g. gravity.

Sketch a force diagram showing the forces acting on a moving car.

Summarise the difference between mass and weight.

The mass of an object is the amount of matter it contains.

Weight is a force caused by gravity. The weight of an object is the gravitational force between the object and the Earth.

Friction

How can friction be increased?

Create a "rougher" surface on the objects.

How can friction be reduced?

By applying lubricant/oil.

Give an example of where friction is useful.

Brakes on a car to help slow the car down.

Give an example of where friction is not useful.

Friction in engines and machinery.

Pressure

Define pressure.

Pressure is the amount of force pushing on a certain area.

Give the equation used to calculate pressure. State the units in your equation.

Pressure = force ÷ area
 $(\text{N/m}^2) \quad (\text{N}) \quad (\text{m}^2)$
 N/m^2 is also called Pascal (Pa)

Use the equation to fill in the table below.

Pressure (Pa)	Force (N)	Area (m^2)
10	200	20
4,000	800	0.2
6	180	30

Springs

State the equation used to calculate the energy transferred in stretching.

Energy transferred in stretching (J) = $\frac{1}{2} \times \text{spring constant (N/m)} \times (\text{extension})^2 (\text{m})^2$

Balanced and Unbalanced forces

Sketch a force diagram of balanced forces acting on a skydiver. Label these forces.

Sketch a force diagram of unbalanced forces acting on a skydiver. Label these forces.

If the forces on an object are balanced, what will happen to the object?

- If the object is stopped: it will remain stopped.
- If the object is moving: it will continue to move at the same speed and in a straight line.

State the two things that can happen if the forces on an object are unbalanced.

- The speed will change.
- The direction of motion will change.
