November 2011 N5 Power Machines:

Fueling Freedom Stephen Moore, Kathleen Hartnett White, 2016-05-23 Fossil fuel energy is the lifeblood of the modern world. Before the Industrial Revolution, humanity depended on burning wood and candle wax. But with the ability to harness the energy in oil and other fossil fuels, quality of life and capacity for progress increased exponentially. Thanks to incredible innovations in the energy industry, fossil fuels are as promising, safe, and clean an energy resource as has ever existed in history. Yet highly politicized climate policies are pushing a grand scale shift to unreliable, impractical, incredibly expensive, and far less efficient energy sources. Today, fossil fuel has become such a dirty word that even fossil fuel companies feel compelled to apologize for their products. In *Fueling Freedom*, energy experts Stephen Moore and Kathleen Hartnett White make an unapologetic case for fossil fuels, turning around progressives' protestations to prove that if fossil fuel energy is supplanted by green alternatives for political reasons, humanity will take a giant step backwards and the planet will be less safe, less clean, and less free.

Machine Learning for Networking Éric Renault, Selma Boumerdassi, Paul Mühlethaler, 2021-03-02 This book constitutes the thoroughly refereed proceedings of the Second International Conference on Machine Learning for Networking MLN 2019 held in Paris, France, in December 2019. The 26 revised full papers included in the volume were carefully reviewed and selected from 75 submissions. They present and discuss new trends in deep and reinforcement learning, pattern recognition, and classification for networks, machine learning for network slicing, optimization, 5G system user behavior prediction, multimedia IoT security and protection, optimization, and new innovative machine learning methods, performance analysis of machine learning algorithms, experimental evaluations of machine learning data mining in heterogeneous networks, distributed and decentralized machine learning algorithms, intelligent cloud support, communications resource allocation, energy aware communications software defined networks, cooperative networks, positioning and navigation systems, wireless communications, wireless sensor networks, underwater sensor networks.

Distinguished Figures in Mechanism and Machine Science Marco Ceccarelli, Alessandro Gasparetto, 2022-12-02 This book discusses the technological developments achieved by distinguished figures in the history of mechanism and machine science (MMS). This is the fifth volume of a series of books which gathered contributions on the leading scientists in the field. This book focuses specifically on the IFToMM community and its activities over the last 50 years, showcasing who is who in MMS and emphasizes, together with the previous books of the series, the significance of MMS through time. Each chapter recognizes persons whose scientific work resulted in relevant technical developments in the historical evolution of MMS within IFToMM. Biographical notes describing the efforts and achievements of these persons are included as well, but a technical survey is the core of each chapter, offering a modern interpretation of their legacy.

Digital Technology for Humans Robert Hanna, 2025-06-02 Digital ethics and AI ethics are of fundamental importance for humankind and its future. Hanna shows how specifically Kantian moral principles can be applied to the design, production, and implementation of digital technology with a

special focus on how these principles flow from the concept and fact of human dignity His core thesis is that digital technology is nothing more and nothing less than a tool created by humankind for the betterment of humankind whose use should be constrained by Kantian moral principles grounded in human dignity This thesis promises to stimulate new research on Kantian approaches to digital ethics and AI ethics It also has important political implications including a clarion call for us to engage in the self conscious self disciplined and free exercise of our own innate cognitive affective and practical capacities in the face of new and exceptionally powerful forms of digital technology e g chatbots that threaten to undermine our ability to think feel and act for ourselves

Investigating Family, Food, and Housing Themes in Social Studies Cynthia Williams Resor, 2017-10-08 Investigating Family Food and Housing Themes in Social Studies asks students to critically examine their own culture by contrasting it with the daily lives of average people in the past What people ate where people lived and the functions of families are examined and contrasted to subjective cultural ideals prescribing what families food and housing ought to have been The relationship between housing food and family and social class status and gender are emphasized Each chapter includes essential questions to focus student inquiry historical overviews focused on changes in family food and housing from the pre industrial era through its transformation during the Industrial Revolution and into the twentieth century learning activities and primary source documents and images This unique approach to teaching history and social studies supports thematic instruction culturally responsive teaching place based education and literacy in the elementary middle or secondary classrooms

Is the Universe a Hologram? Adolfo Plasencia, 2017-05-04 Questions about the physical world the mind and technology in conversations that reveal a rich seam of interacting ideas Science today is more a process of collaboration than moments of individual eureka's This book recreates that kind of synergy by offering a series of interconnected dialogues with leading scientists who are asked to reflect on key questions and concepts about the physical world technology and the mind These thinkers offer both specific observations and broader comments about the intellectual traditions that inform these questions doing so they reveal a rich seam of interacting ideas The persistent paradox of our era is that in a world of unprecedented access to information many of the most important questions remain unsolved These conversations conducted by a veteran science writer Adolfo Plasencia reflect this with scientists addressing such issues as intelligence consciousness global warming energy technology matter the possibility of another earth changing the past and even the philosophical curveball is the universe a hologram The dialogues discuss such fascinating aspects of the physical world as the function of the quantum bit the primordial cosmology of the universe and the wisdom of hewn stones They offer optimistic but reasoned views of technology considering convergence culture algorithms Beauty Truth the hacker ethic AI and other topics And they offer perspectives from a range of disciplines on intelligence discussing subjects that include the neurophysiology of the brain affective computing collaborative innovation and the wisdom of crowds Conversations with Hal Abelson Ricardo Baeza Yates John Perry Barlow Javier Benedicto Jos Bernab u Michail Bletsas Jose M Carmena David
