

Conquer Verb-Tense Consistency

A verb's tense indicates when the action that it describes takes place—in the past (I ran), in the present (I run), or in the future (I will run).

The verb tense you use should remain consistent, or the same, unless you have a good reason to change it. The verb tense should remain consistent throughout sentences, throughout paragraphs, and throughout the entire body of whatever you are writing—again, unless you have a good reason to change it. For example:

Incorrect: When my mom **goes** to the store, she **bought** a treat for everyone.
(Goes is in the present tense, and bought is in the past tense—and you don't have a good reason to change the tense you are using.)

Correct Option 1: When my mom **goes** to the store, she **buys** a treat for everyone.
(Both verbs are in the present tense.)

Correct Option 2: When my mom **went** to the store, she **bought** a treat for everyone.
(Both verbs are in the past tense.)

So what IS a good reason to change the verb tense you are using? When you are describing events that happen at different times. For example:

Correct: Lindsey **plays** field hockey now, but last year she **was** on the soccer team.
(You are describing something that is happening now, and you are also describing something that happened in the past.)

Correct: We **took** first place in the state competition; next week we **will compete** in the national competition. (You are describing something that happened in the past, and you are also describing something that will happen in the future.)

Directions: In each group of sentences or paragraphs below, place a ✓ in front of the sentence or paragraph that correctly uses verb tenses.

2. a _____ Suddenly, the lights flickered and an unsinvited guest enters the room.

Drug Use, Recovery, and Maternal Instinct Bias Caitlyn D. Placek, 2024-01-26 Drug Use Recovery and Maternal Instinct Bias A Biocultural and Social Ecological Approach draws upon theoretical perspectives in anthropology and public health to provide insight into the barriers women experience when seeking treatment for substance use disorders In both theoretical perspectives in biological anthropology and social discourse within the United States there is an emphasis on explaining why women avoid or should avoid using psychoactive substances during their reproductive years especially during pregnancy Theories of women s drug avoidance during the childbearing years rely on statistics to show that women are less likely to use all types of illicit drugs than their male counterparts This gender gap however is closing in high income countries HICs calling for more research on the biocultural and social ecological factors contributing to women s drug use and the barriers to their recovery The book uses qualitative data from participants in Indiana to illustrate women s struggles along the pathway to recovery The overarching conclusion is that internalized models of maternal instinct a topic inherent in theoretical and public discourse can often impede efforts for women seeking treatment and recovery is only possible when proper social and structural supports are in place
