Developing Software for Symbian OS Steve Babin, 2008-02-28 Many problems encountered by engineers developing code for specialized Symbian subsystems boil down to a lack of understanding of the core Symbian programming concepts. Developing Software for Symbian OS remedies this problem as it provides a comprehensive coverage of all the key concepts. Numerous examples and descriptions are also included which focus on the concepts the author has seen developers struggle with the most. The book covers development ranging from low level system programming to end user GUI applications. It also covers the development and packaging tools as well as providing some detailed reference and examples for key APIs. The new edition includes a completely new chapter on platform security. The overall goal of the book is to provide introductory coverage of Symbian OS v9 and help developers with little or no knowledge of Symbian OS to develop as quickly as possible. There are few people with long Symbian development experience compared to demand due to the rapid growth of Symbian in recent years and developing software for new generation wireless devices requires knowledge and experience of OS concepts. This book will use many comparisons between Symbian OS and other OSes to help in that transition. Get yourself ahead with the perfect introduction to developing software for Symbian OS.

Personal Content Experience Juha Lehtikainen, Antti Aaltonen, Pertti Huuskonen, Ilkka Salminen, 2007-04-30 The new era of powerful mobile computing and sensing devices having ever larger memories and personal databases brings to light a number of difficult problems in software interface design: search organization of information and methods for inferring context and for sharing personal content. The authors have done an admirable job at describing the problems and opportunities and as such this book should be on the shelves of researchers struggling to make these mobile devices truly valuable to the ever expanding number of their users. David G. Stork, Chief Scientist, Ricoh Innovations. Personal Content Experience is a comprehensive introduction to mobile personal content. The book introduces and explores issues such as context capture, user interfaces for continuous mobile use, UI design for mobile media applications, metadata, magic virtual communities and ontologies. User interactions and behavioural patterns with personal content are also covered, resulting in a GEMS lifecycle model for analysing media devices, services, applications and user interfaces. In addition, the book describes an extensible software architecture targeted at content management in mobile devices, pointing out the essential topics that will benefit anyone developing mobile content intensive applications and services. Personal Content Experience Establishes a foundation for analyzing applications, services and user interfaces targeted at personal content. Provides a strong industrial insight combining hands on examples, application concepts and software architecture descriptions with theoretical frameworks and models. Offers a multi disciplinary approach considering both user perspective and technology aspects. This book is a clear and practical guide to the field of personal content and will be invaluable to practitioners in mobile industry and digital content management, media intensive application developers, content creators and distributors, academic researchers and lecturers in computer science and multimedia. **HWM**

Why do we shop and buy the way we do? In a work that will explain much about the American character Eisenberg chronicles the dynamics of selling and buying from almost every angle. Neither a cheerleader for consumption nor an anti consumerist scold he explores with boundless curiosity the vast machinery aimed at inducing us to purchase everything from hair mousse to a little black dress. He leads us with understated humor into the broad universe of marketing retailing advertising and consumer and scientific research an arsenal of powerful forces that combine to form what he calls The Sell Side. Through the rest of the book Eisenberg leads us through the Buy Side a journey directly into our own hearts and minds asking among other questions What are we really looking for when we buy? Why are we alternately excited guilt ridden satisfied disappointed and recklessly impulsive? What are our biases need for status impulses to self express that lead us individually to buy what we buy? Are you a classic buyer your head wants to do the right thing or a romantic buyer your heart just wants to have fun? How do men and women differ in their attitudes towards shopping and does the old cliché Women shop men buy apply any longer? Of special interest are the author's findings on the subject of What Makes a Good Buy. We all purchase things that we sooner or later regret but what are the guidelines for making purchases that we'll never regret? What for instance defines the perfect gift? For here in one vivid journey is a memorable panoramic portrait of our everyday self delusions desires and dreams
