**Licensing Theory and French Parasitic Gaps** C.R. Tellier, 2012-12-06 The study of parasitic gap constructions e.g. these are the reports which you corrected \_ before filing \_ i has been a very lively area of research over the last decade The impetus behind this lies mostly in the marginality of the construction Clearly the intuitions that native speakers have about parasitic gaps do not stem from direct instruction hence it is reasoned such knowledge follows from the restrictions imposed by Universal Grammar Furthermore it is unlikely that any principle of Universal Grammar refers specifically to parasitic gap constructions their syntactic and interpretive properties must instead follow entirely from independent principles My own interest in the phenomenon was sparked a few years ago when in a novel I came across a sentence like the following Chait un armateur dont le prestige \_ reposait largement sur la fortune \_ he was a shipbuilder of whom the prestige was largely based on the wealth As the indices indicate the interpretation of the French

sentence is unambiguous both the prestige and the wealth necessarily pertain to the same individual In this aspect the sentence much resembles the English parasitic gap construction above in the former case too the complements of correct and file must corefer with the noun phrase heading the relative the reports Yet there is an important difference between the two constructions Verbs like correct and file subcategorize their complements

**Mismatch** Ronald Giphart, Mark van Vugt, 2018-02-15 Our brains evolved to solve the survival problems of our Stone Age ancestors so when faced with modern day situations that are less extreme they often encounter a mismatch Our primitive brains put us on the wrong foot by responding to stimuli that in prehistoric times would have prompted behaviour that was beneficial If you've ever felt an anxious fight or flight response to a presenting at a board meeting equivalent to facing imminent death by sabre toothed tiger then you have experienced a mismatch Mismatch is about the clash between our biology and our culture It is about the dramatic contrast between the first few million years of human history when humans lived as hunters and gatherers in small scale societies and the past twelve thousand years following the agricultural revolution which have led us to comfortable lives in a very different social structure Has this rapid transition been good for us How do we using our primitive minds try to survive in a modern information society that radically changes every ten years or so Ronald Giphart and Mark van Vugt show that humans have changed their environment so drastically that the chances for mismatch have significantly increased and these conflicts can have profound consequences Reviewed through mismatch glasses social societal and technological trends can be better understood ranging from the popularity of Facebook and internet porn to the desire for cosmetic surgery to our attitudes towards refugees Mismatches can also affect our physical and psychological well being in terms of our attitudes to happiness physical exercise choosing

**Parasitic Personhood and the Ontology of Eating**  
 Lisa Heldke, 2025-08-28 Humans must eat and our eating involves us in a cascade of eating relationships that leave life and death biting into each other These realities should but often do not profoundly shape our understanding of personhood This book explores parasitic personhood an alternative to atomistic individualism that acknowledges the biological individual as a network of persistent biological relationships a holobiont and draws insight from the astonishing frequency and variety of parasitic feeding relationships What happens to our conception of personhood if we consider parasitism as more than just a threat to our health Parasitism is a remarkably common form of life however we tend to think of parasites only as dangerous pestilential organisms that should be eliminated What if parasitism in particular persistent eating relationships that threaten to destabilize host organisms were instead the model in terms of which we understood what it means to be a person What if we acknowledged the ineliminability indeed the centrality of parasitism to life and embraced both the persistent eating and the precarity that they entail as central to our understanding of personhood In advocating for parasitic personhood this book joins a history of efforts to uproot atomistic individualism the remarkably durable understanding of personhood that is aptly portrayed by its most well known eighteenth century model the billiard ball smoothly self contained with relationships decidedly external to it The parasitic alternative conceives persons as collections of organisms in relationships that are by turns and all at once essential precarious definitive destabilizing stable and shifting The book asks in what does parasitic personhood consist It goes on to examine some implications of this conception of personhood how is moral agency constituted for the parasitic person and how does parasitic personhood expand our understanding of aesthetic engagement and appreciation This book will absorb anyone who is interested in thinking about the metaphysical significance of their need to eat and their reliance on myriad other organisms to enable them to do so It will engage students and scholars of food and

eating particularly those working on the metaphysics of food food and personhood fermentation and the microbiome as well as philosophers considering the ontological significance of food and eating **The Dead Travel Fast** Eric
