Drainage Basin Dynamics Pravat Kumar Shit, Biswajit Bera, Aznarul Islam, Sandipan Ghosh, Gouri Sankar Bhunia, 2022-01-01 This volume provides a versatile introduction to the study of drainage basin evolution, morphology, drainage basin hydrology and sedimentology, human interference, natural and anthropogenic hazards and various management techniques. This book offers the responsible factors of sediment yield and their absolute and specific growth and rate of delivery through tributaries to the main streams. Rivers are important geomorphic agents which reflect an amazing variety of form and behaviour showing the wide range of natural environment in which they are originated. The drainage system evolution and spatial network development within the dynamic nature are being discussed and how they are adjusted in the geomorphic time scale over the millions of years. This book shows how drainage systems function and react to change and why this thoughtful is required for flourishing integrated basin management. In tropical and sub-tropical countries, population pressures as well as different developmental projects are being executed on the drainage basin without proper planning. Today scientists consider drainage basin as an administrative unit during implementation of regional projects. In this context, this book will carry a benchmark for scholars and young scientists.

**Disaster Risk Management in Agriculture** Huong Ha, R. Lalitha S. Fernando, Sanjeev Kumar Mahajan, 2019-03-20 The challenges related to disaster risk management (DRM) in the agricultural sector are now widely linked to sustainable environment. The fact remains that almost every day a disaster strikes in some part of the world. The regular occurrence of natural and man-made disasters has forced the worldwide communities to look for novel solutions to prevent and mitigate such disasters. This volume brings together probing studies to disseminate the work of outstanding scholars and practitioners especially in South Asian countries. Thus it highlights the need to amalgamate and coordinate the resources and agencies involved in DRM in agriculture to ensure the quality of life to the victims after disasters. The authors incorporate specific themes correlated with DRM in South Asia. They intend to assess i) the consequences of distinct disaster risks in agriculture ii) the ways in which diverse disaster risk problems are handled in distinct settings and iii) the different methodologies embraced by different sectors to prepare for disaster risk.
