

**THIS MANUAL IS DESIGNED TO MAKE IT AS EASY AS POSSIBLE  
FOR YOU TO SET UP, OPERATE AND MAINTAIN  
YOUR NEW AIR COMPRESSOR**

## **GENERAL INFORMATION**

You have purchased a complete portable compressor outfit consisting of a 2 cylinder single-stage air compressor with air tank, air hose assembly, wheels and handle. You will also find an air chuck and a helpful "Power Painting With Sprayers" booklet. The 2 horsepower unit has a removable foot extension bracket which allows for stationary mounting.

These units can be used for operating caulking guns, grease guns, air brushes, sandblasters, air tools, etc., or inflating tires and plastic toys, spraying weed killer, insecticides, etc.

## **GENERAL DESCRIPTION OF OPERATION**

To compress air, the pistons move up and down in the cylinder. On the downstroke, air is drawn in through the air intake valve. The exhaust valve remains closed. On the upstroke of the piston, air is compressed. The intake valves close and compressed air is forced out through the exhaust valve, through the check valve and into the air tank. Working air is not available until the compressor has raised the air tank pressure above that required at the air outlet. The air intake opening must be kept clear of obstructions which could reduce air delivery of the compressor.

## **ASSEMBLY INSTRUCTIONS**

### **Tools Needed For Assembly**
