

Geography

Landforms

Natural features of the Earth's surface

Landforms are found all over the world. They are natural features on the Earth's surface. There are many kinds of landforms. There are even landforms under the water! Some types of landforms are beaches, canyons, coasts, deserts, hills, islands, lakes, mountains, oceans, plateaus, rivers, valleys, volcanoes, and waterfalls.

Over time, landforms change in their appearance. This is caused by erosion. Erosion is when water, wind, and ice remove or wear down pieces of the landform.

Sometimes landforms are protected by the government in National Parks like The Grand Canyon, The Great Smoky Mountains, or Yosemite National Park. Protected means they are preserved from harm. Other times, there are landforms all around us. When you ride your bike up a hill, you are riding up a landform. If you visit the state of Hawaii, you are visiting an island which is a kind of landform. Sometimes people make landforms like lakes or hills and some landforms can't be made by people.

Grand Canyon Horseshoe Bend
Horseshoe Bend of the Colorado River in Arizona

Vocabulary

landforms
erosion
protected
