Wong,2011 This dissertation is composed of three essays Essay 1 Does School Start Too Early For Student Learning considers the connection between school start time and student performance Biological evidence indicates that adolescents internal clocks are designed to make them fall asleep and wake up at later times than adults This science has prompted widespread debate about delaying school start times in the U S a country which has some of the earliest start

times worldwide The debate suffers however from a glaring absence of evidence the small number of prior studies has been too low powered statistically to test whether later start times improve achievement I fill the gap by studying achievement across a large nationally representative set of high schools that have varying start times I identify the positive effect of later clock start times as well as the independent effect of greater daylight at school start time My primary empirical method is cross sectional regression with rich controls for potentially confounding variables The findings are confirmed by regression discontinuity analysis focused on schools close to time zone boundaries I quantify the net gain in welfare from having an additional hour of sunlight before school starts by comparing the substantial lifetime earnings benefits for students against the likely the societal costs

Essay 2 Student Success and Teaching Assistant Effectiveness In Large Classes considers the impact teaching assistants TAs have on student performance In universities TAs play a crucial role by providing small group instruction in lecture courses with large enrollment The multiplicity of TAs creates both positive opportunities and negative incentives On the one hand some TAs may excel at tasks such as helping struggling students at which other TAs fail If so all students may be able to learn better if they can match themselves to the TA that best suits their needs On the other hand the multiplicity of TAs means that students in the same class often receive instruction that varies in quality even though they are ultimately graded on the same standard In this paper we use data from a large lecture course in which students are conditionally randomly assigned to TAs In addition to administrative data on scores and grades we use survey data which we generated on students initial preparation their study habits and their interactions with TAs We identify the existence of variation among TAs in teaching effectiveness We also identify how TAs vary in their effectiveness with certain subpopulations of students the least and best prepared students with different backgrounds and so on Using our parameter estimates we simulate student achievement under scenarios such as random assignment to TAs elimination retraining of the least effective TAs and matching of TAs to students based on initial information to show the potential gains in student welfare from more efficient matching

Essay 3 A Study of Student Majors A Historical Perspective considers whether differing financial returns across degrees are a significant factor in a student s choice of a major During the late 1990s the U S experienced a technology boom that significantly increased the initial salary offers to engineering students and computer science students in particular These dramatic increases in returns provide an excellent opportunity to examine not only how students respond to salary levels but also to salary trends The existing literature has focused on the extent to which differing financial returns can affect a student s choice of undergraduate major This paper extends the analysis to test if trends in salary levels also affect the share of students selecting into various majors using a comprehensive dataset of all post secondary institutions I find that students select into majors that offer higher salaries and have greater wage growth Using a flexible empirical model that allows students to respond to both changes in salary levels and growth I find that the results hold across majors and within engineering disciplines These results help to explain why for instance the percentage of

students choosing to major in computer science grew more rapidly than could be explained by salary level alone **Illinois Reading Council Journal** ,2016 **Educators in Action** American Productivity & Quality Center,2004-09 *Passing the South Carolina HSAP in Mathematics* Colleen Pintozi,Laurie K Sabbarese,2003-11-01 South Carolina HSAP in Mathematics Test Preparation **Assessment is Essential** Susan Green,Robert L Johnson,2009-05-27 Assessment is Essential offers a novel approach for educational assessment courses Stressing a practical approach that encourages students to think critically about designing the appropriate assessment for a wide range of situations Green provides students with tools they can use in their future classrooms HSAP ,2010 The South Carolina High School Assessment Program consists of two tests one in English language arts and one in mathematics that are administered to public high school students in South Carolina under the requirements of state and federal laws South Carolina law mandates that all public school students pass an exit examination as one requirement for receiving a high school diploma Federal law mandates that states assess public high school students academic achievement in reading language arts and mathematics **Aligning the NWEA RIT Scale with the South Carolina High School Assessment Program** John Cronin,2004 Each year South Carolina students participate in testing as part of the South Carolina assessment program Students in grades 3 through 8 take the Palmetto Achievement Challenge Tests PACT in English Language Arts and Mathematics Students in grade 10 take the High School Assessment Program HSAP in English Language Arts and mathematics These tests serve as an important measure of student achievement for the state s accountability system Results from these assessments are used to make state level decisions concerning education to meet Adequate Yearly Progress AYP reporting requirements of the No Child Left Behind Act NCLB and to inform schools and school districts of their performance In addition students must achieve Level 2 performance on the HSAP in order to graduate from high school The South Carolina Department of Education has developed scales that are used to assign students to one of four performance levels on the HSAP Level 2 is considered the level that represents passing performance Many students who attend school in South Carolina also take tests developed in cooperation with the Northwest Evaluation Association NWEA These tests report student performance on a single cross grade scale which NWEA calls the RIT scale This study investigated the relationship between the scales used for the HSAP assessments and the RIT scales used to report performance on NWEA tests The study determined the reading language usage and mathematics RIT score equivalents for the HSAP performance levels in English Language Arts and Mathematics Test records for more than 3 500 students were included in this study Three methods generated an estimate of RIT cut scores that could be used to project HSAP performance levels Rasch SOS methods generally produced the most accurate cut score estimates Accuracy of predicting HSAP passing performance was above 88% for all subjects when using the best methodology Type I errors never ranged above 6% when the best methodology was employed Contains 12 tables and figures Cumulated Index Medicus ,1976 South Carolina HSAP Coach : Mathematics, Exit Level Merv Edwards,2005 Multiple Choice questions and
