

# PARENTING STYLES

Parenting styles are often categorized into four main types based on the work of psychologist **Diana Baumrind**.

These styles reflect different approaches to parenting and have varying impacts on a child's development.

## **AUTHORITATIVE**

**Style:** Parents have clear expectations, but are also responsive, nurturing, and willing to collaborate with the child.

**Discipline:** Natural consequences, guidance, and discussion are used to remediate behaviors and establish boundaries.

**Impact:** Kids tend to be more self-reliant, socially competent, and have higher self-esteem and academic achievement due to reliable and considerate support.

## **DISENGAGED**

**Style:** Parents are neither demanding nor responsive and they provide little emotional support, guidance, or attention to the child's needs.

**Discipline:** Due to lack of parental presence or investment, rules and boundaries are not enforced.

**Impact:** Kids may experience emotional and behavioral difficulties, have low self-esteem, and struggle academically and socially due to the lack of parental involvement.

## **AUTHORITARIAN**

**Style:** Parents are highly demanding and directive, and they expect compliance without much explanation or flexibility.

**Discipline:** Strict punishment, lectures, and yelling are used to enforce rules.

**Impact:** Kids may be superficially obedient, but tend to struggle with low self-esteem, social competence, and anxiety due to the lack of autonomy, collaboration, and empathetic parental response.

## **PERMISSIVE**

**Style:** Parents are highly responsive and accommodating, but have few demands, boundaries, or expectations.

**Discipline:** Rules and boundaries are not enforced, and kids are often appeased for poor behavior or emotional distress.

**Impact:** Kids may exhibit increased independence and creativity, but may also struggle with self-regulation, discipline, anxiety, and authority due to lack of structure.
