housing, through the Balston Grade SR Microfibre® Filter Cartridge (outside-to-inside flow), and then downward to the exit port. The Grade SR Microfibre Filter Cartridge, rated at 98+ % efficiency for 0.01 micron and larger particles, removes essentially all the suspended solid particles and the remaining water droplets. The water draining from the filter cartridge and the expansion chamber is automatically removed from the housing by the automatic condensate drain.

The Balston Grade SR Microfibre Filter Cartridge, the heart of the Model 23SR Filter, combines rugged construction with remarkably efficient filtration of solid particles and liquid droplets. Solid particles remain trapped in the depth of the filter cartridge, while liquid water drips from the filter cartridge to the automatic drain. The Microfibre Filter Cartridge is constructed from chemically inert borosilicate glass fibers and a fluorocarbon resin binder. The filter cartridge is completely free of impurities which could extract into the steam, and is in compliance with USFDA regulations as stated.

Bulletin TI-SteamSR-M

USFDA, USDA, and 3A Compliance

Balston SR Steam Filters are in full compliance with the requirements of the United States Food, Drug and Cosmetic Act. These filters may be used with steam, air, and other gases which directly contact food and food ingredients, including milk, alcoholic and non-alcoholic liquids.

These filters also meet the regulations for Indirect Food Additives used as Basic Components for Repeated Use Food Contact Surfaces as specified in 21 CFR Part 177, and Current Good Manufacturing Practices, 21 CFR Part 110.

The Balston SR Steam Filters are in full compliance with the 3A Accepted Practices (Number 609-03) for producing steam of culinary quality.

The Balston SR Steam Filters have also been accepted by the USDA for use in federally inspected meat and poultry plants.

The Balston 23SR Steam Filter What it is - How it works

The Balston 23SR Steam Filter contains a patented Microfibre® Filter Cartridge in a rugged stainless steel housing designed specifically for steam service. Included as standard items with the 23SR Steam Filter are a stainless steel condensate drain and high quality bleeder valve. The unit as received is complete and ready for installation.
