Assistive Technology for Blindness and Low Vision Roberto Manduchi, Sri Kurniawan, 2018-09-03 Assistive technology has made it feasible for individuals with a wide range of impairments to engage in many activities such as education and employment in ways not previously possible. The key factor is to create consumer driven technologies that solve the problems by addressing the needs of persons with visual impairments. *Assistive Technology for Blindness and Low Vision* explores a broad range of technologies that are improving the lives of these individuals. Presenting the current state of the art, this book emphasizes what can be learned from past successful products as well as what exciting new solutions the future holds. Written by world class leaders in their field, the chapters cover the physiological bases of vision loss and the fundamentals of orientation, mobility and information access for blind and low vision individuals. They discuss technology for multiple applications: mobility, wayfinding, information access, education, work, entertainment, including both established technology and cutting edge research. The book also examines computer and digital media access and the scientific basis for the theory and practice of sensory substitution. This volume provides a holistic view of the elements to consider when designing assistive technology for persons with visual impairment, keeping in mind the need for a user driven approach to successfully design products that are easy to use, well priced and fill a specific need. Written for a broad audience, this book provides a comprehensive overview and in depth descriptions of current technology for designers, engineers, practitioners, rehabilitation professionals and all readers interested in the challenges and promises of creating successful assistive technology.

Human-Computer Interaction: Design and Development Approaches Julie A. Jacko, 2011-06-24 This four volume set LNCS 6761-6764 constitutes the refereed proceedings of the 14th International Conference on Human Computer Interaction (HCI) 2011 held in Orlando, FL, USA in July 2011 jointly with 8 other thematically similar conferences. The revised papers presented were carefully reviewed and selected from numerous submissions. The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers of this first volume are organized in topical sections on HCI design, model based and patterns based design and development, cognitive, psychological and behavioural issues in HCI, development methods, algorithms, tools and environments, and image processing and retrieval in HCI. **PC World**, 2009-07 **Studying Mobile Media** Larissa Hjorth, Jean Burgess, Ingrid Richardson, 2012-04-23 The iPhone represents an important moment in both the short history of mobile media and the long history of cultural technologies. Like the Walkman of the 1980s, it marks a juncture in which notions about identity, individualism, lifestyle and sociality require rearticulation. This book explores not only the iPhone's particular characteristics, uses and affects, but also how the iPhone moment functions as a barometer for broader patterns of change. In the iPhone moment, this study considers the convergent trajectories in the evolution of digital and mobile culture and their implications for future scholarship. Through the lens of the iPhone as a symbol, culture and a set of material practices around contemporary convergent mobile media, the essays collected here explore the most productive
