

Grade 4: NC READY EOG - Math Menu of Activities

Using these EOG review lessons for assessment preparation can serve as a frame for meaningful performance goals as it can help learners to clarify targeted standards; yield evidences of understandings or misunderstandings; and support learning outcomes and benchmarks. The purpose of this resource is to inform teaching and improve learning so students can achieve the highest academic standards possible in mathematics.

Not all of the content in a given grade is emphasized equally in the standards. Some clusters require greater emphasis than others based on the depth of the ideas, the time it takes to master, and/or their importance to future mathematics. Some things having greater emphasis is not to say that anything in the standards can safely be neglected in instruction. The major works for the grade level are listed in the table below

The following outlines the percentages of items in each domain of the NC MATH EOG for the grade level:

Fourth Grade	
Major Clusters	Supporting/Additional Clusters
Operations and Algebraic Thinking <ul style="list-style-type: none">• Use the four operations with whole numbers to solve problems. Number and Operations in Base Ten <ul style="list-style-type: none">• Generalize place value understanding for multi-digit whole numbers.• Use place value understanding and properties of operations	Operations and Algebraic Thinking <ul style="list-style-type: none">• Gain familiarity with factors and multiples.• Generate and analyze patterns. Measurement and Data <ul style="list-style-type: none">• Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit.

Dorans,Mary Pommerich,Paul W. Holland,2007-10-15 In their preface to the second edition of *Test Equating Scaling and Linking* Mike Kolen and Bob Brennan 2004 made the following observation Prior to 1980 the subject of equating was ignored by most people in the measurement community except for psychometricians who had responsibility for equating p vii The authors went on to say that considerably more attention is now paid to equating indeed to all forms of linkages between tests and that this increased attention can be attributed to several factors 1 An increase in the number and variety of testing programs that use multiple forms and the recognition among professionals that these multiple forms need to be linked 2 Test developers and publishers in response to critics often refer to the role of linking in reporting scores 3 The accountability movement and fairness issues related to assessment have become much more visible Those of us who work in this field know that ensuring comparability of scores is not an easy thing to do Nonetheless our customers the test takers and score users either assume that scores on different forms of an assessment can be used interchangeably or like the critics above ask us to justify our comparability assumptions And they are right to do this After all the test scores that we provide have an impact on decisions that affect people s choices and their future plans From an ethical point of view we are obligated to get it right *North Carolina State (NC EOG) , 3rd Grade MATH Practice Tests ,Volume 1* 979-8-89620-554-8,2025-02-04
