
Peds: Chapter 23 cardiac questions NCLEX

What procedure uses high frequency sound waves obtained by a transducer to produce an image of cardiac structures?

- a. ECHO
- b. Electrocardiography
- c. Cardiac cath
- d. Electrophysiology - correct answer A. ECHO

- must lie completely still

After a patient returns from cardiac catheterization, the nurse notes that the pulse distal to the catheter insertion site is weaker (+1). The most appropriate nursing intervention is to:

- a. elevate the affected extremity
- b. document the findings and continue to monitor
- c. notify the HCP of the finding
- d. apply warm compresses to the insertion site - correct answer b. document the findings and continue to monitor

- may be weaker a few hours after

- keep the extremity straight and immobile, elevation is not necessary

- warm compresses would increase the risk of bleeding from the insertion site

Congenital heart defects have traditionally been divided into acyanotic or cyanotic defects. Based on the nurse's knowledge of congenital heart defects, this system in clinical practice is:

- a. helpful, because it explains the hemodynamics involved
- b. helpful, because children with cyanotic defects are easily identified
- c. problematic because cyanosis is rarely present in children
- d. problematic, because children with acyanotic heart defects may develop cyanosis - correct answer D. Problematic, because children with acyanotic heart defects may develop cyanosis

Practical Pediatric Cardiology Alan G. Magee,Jan Till,Anna N. Seale,2015-11-02 Heart disease in children has a number of diagnostic traps for the unwary and all of us involved in the specialty have been caught at one time or another For example it is sometimes very difficult to differentiate between respiratory and cardiac disease in infants and between neurological and cardiac conditions in older children and the consequences of taking the wrong path can be significant This book is a collection of cases highlighting situations which can ensnare even the best cardiologist Although they illustrate the importance of taking a good history and performing a thorough examination the most important lesson is learning to keep an open mind and develop the ability to think laterally As clinicians we need to have the confidence to make a decision for our patients but also the humility to be able to acknowledge that we don t always get it right first time and it is imperative that we learn from the experience We hope the reader will find these short chapters interesting and while they are not evidence based medicine in the true sense they do represent a wide range of clinical experience from which we can all learn
