Paper 1 Of Afrikaans 4 Final Examination For 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

The Semiotics of New Spaces Charlyn Dyers, 2018-11-28
In South Africa the township or sub-economic state housing development has achieved a very significant position as a site for sociolinguistic research. *The Semiotics of New Spaces: Language and Literacy Practices in one South African Township* looks at the ways in which people are responding through their semiotic practices to the intense socio-historical changes taking place in post-apartheid South Africa. The study is set against the backdrop of Wesbank, one of the first racially mixed housing developments in the Western Cape. The result is a range of related topics such as how cross-cultural and crosslinguistic families influence the language practices of their younger members, the impact of translingual friendships on language practices and attitudes, the ways in which older people use their existing literacies to negotiate the multilingual realities of the township and aspects such as identity, voice and agency as markers of a developing participatory citizenship.

Perspectives on Arabic Linguistics XXXI Amel Khalfaoui, Youssef A. Haddad, 2019-07-15
This volume brings together ten peer-reviewed articles on Arabic linguistics. The articles are distributed over three parts: phonetics and phonology, sociolinguistics and pragmatics, and language acquisition. Including data from North African, Levantine and Gulf varieties of Arabic as well as Arabic varieties spoken in diaspora, these articles address issues that range from phonetic neutralization and diminutive formation to diglossia, dialect contact and language acquisition in heritage speakers. The book is valuable reading for linguists in general and for those working on descriptive and theoretical aspects of Arabic linguistics in particular.
