Paper Airplanes And Wing Span Investigation:

Topics and Trends in Current Statistics Education Research Gail Burrill, Dani Ben-Zvi, 2018-12-29 This book focuses on international research in statistics education providing a solid understanding of the challenges in learning statistics. It presents the teaching and learning of statistics in various contexts including designed settings for young children, students in formal schooling, tertiary level students and teacher professional development. The book describes research on what to teach and platforms for delivering content, curriculum strategies on how to teach for deep understanding and includes several chapters on developing conceptual understanding, pedagogy and technology, teacher knowledge and beliefs and the challenges teachers and students face when they solve statistical problems, reasoning and thinking. This new research in the field offers critical insights for college instructors, classroom teachers, curriculum designers, researchers in mathematics and statistics education as well as policy makers and newcomers to the field of statistics education. Statistics has become one of the key areas of study in the modern world of information and big data. The dramatic increase in demand for learning statistics in all disciplines is accompanied by tremendous growth in research in statistics education. Increasingly, countries are teaching more quantitative reasoning and statistics at lower and lower grade levels within mathematics, science and across many content areas. Research has revealed the many challenges in helping learners develop statistical literacy, reasoning and thinking and new curricula and technology tools show promise in facilitating the achievement of these desired outcomes.

Proceedings of Mechanical Engineering Research Day 2017 Mohd Fadzli Bin Abdollah, Tee Boon Tuan, Mohd Azli Salim, Mohd Zaid Akop, Rainah Ismail, Haslinda Musa, 2017-05-29 This e-book is a compilation of papers presented at the Mechanical Engineering Research Day 2017 MERD 17 Melaka, Malaysia on 30 March 2017.

Experimental Investigation of Flutter of a Propeller with Clark Y Section Operating at Zero Forward Velocity at Positive and Negative Blade-angle Settings John E. Baker, Russell S. Paulnock, 1949 The highest flutter speeds were found in the vicinity of the angle of zero aerodynamic moment and the flutter speed increased considerably in this region with decreasing pressure. Over the rest of the pitch range the flutter speeds were much lower and varied little with pressure.

Advanced Aircraft Design Egbert Torenbeek, 2013-07-29 Although the overall appearance of modern airliners has not changed a lot since the introduction of jetliners in the 1950s, their safety, efficiency and environmental friendliness have improved considerably. Main contributors to this have been gas turbine engine technology, advanced materials, computational aerodynamics, advanced structural analysis and on-board systems. Since aircraft design became a highly multidisciplinary activity, the development of multidisciplinary optimization (MDO) has become a popular new discipline. Despite this, the

application of MDO during the conceptual design phase is not yet widespread Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes presents a quasi analytical optimization approach based on a concise set of sizing equations Objectives are aerodynamic efficiency mission fuel empty weight and maximum takeoff weight Independent design variables studied include design cruise altitude wing area and span and thrust or power loading Principal features of integrated concepts such as the blended wing and body and highly non planar wings are also covered The quasi analytical approach enables designers to compare the results of high fidelity MDO optimization with lower fidelity methods which need far less computational effort Another advantage to this approach is that it can provide answers to what if questions rapidly and with little computational cost Key features Presents a new fundamental vision on conceptual airplane design optimization Provides an overview of advanced technologies for propulsion and reducing aerodynamic drag Offers insight into the derivation of design sensitivity information Emphasizes design based on first principles Considers pros and cons of innovative configurations Reconsiders optimum cruise performance at transonic Mach numbers Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes advances understanding of the initial optimization of civil airplanes and is a must have reference for aerospace engineering students applied researchers aircraft design engineers and analysts

Spin-tunnel Investigation of the Effects of Mass and Dimensional Variations on the Spinning Characteristics of a Low-wing Single-vertical-tail Model Typical of Personal-owner Airplanes Walter J. Klinar, Jack H. Wilson (Jr.), 1951 This paper presents the results of a spin tunnel investigation of a low wing model typical of present day four place personal owner airplanes to determine the effect of changes in loading tail design and wing shape on spin and recovery characteristics Analysis of the data presented indicates some of the characteristics necessary for meeting present day spinning requirements for personal owner airplanes

Mathematical Modelling: From Theory To Practice Ngan Hoe Lee, Kit Ee Dawn Ng, 2015-01-19 This book documents the journey undertaken by educators from the Mathematics and Mathematics Education MME Academic Group in the National Institute of Education NIE and Singapore schools during a Mathematical Modelling Outreach MMO event in June 2010 under the guidance of renowned experts in the field of mathematical modelling The main goal of MMO was to reach out to Singapore primary and secondary schools and introduce the potentials of mathematical modelling as a platform for eliciting mathematical thinking communication and reasoning among students This book contributes to the expanding literature on mathematical modelling by offering voices from the Singaporean context It suggests how theoretical perspectives on mathematical modelling can be transformed into actual practice in schools all within the existing infrastructure of the current Singapore mathematics curriculum More importantly the book provides documentary evidence on how plans put in place through MMO in 2010 have since been realised The publication of this book is hence timely at this juncture Not only does the book record how MMO was among the first pebbles launched into the pond it also serves as a bridge over which educators can stand upon to view how the ripple effect had

developed from the initial MMO pebble and the directions it may continue to extend Perhaps in the process other ripples in the teaching learning and research of mathematical modelling can be created
