Paper On School Uniforms:

School Uniforms. Research Brief Karen Walker, 2007 Does clothing make the person or does the person make the clothing How does what attire a student wears to school affect their academic achievement In 1996 President Clinton cited examples of school violence and discipline issues that might have been avoided had the students been wearing uniforms School uniforms Prevention or suppression In his 1998 State of the Union address he mentioned the positive impact uniforms had made in the Long Beach Unified School District which has a highly diverse ethnic and socioeconomic population that is also the third largest district in California When students have continuous negative experiences in school dropping out and delinquency tend to be the common responses The role of schools is to provide a positive safe and secure learning environment where students feel protected enough to explore and develop their intellectual and social competencies Hard evidence that proves the wearing of uniforms provides a direct link to better academic achievement is not conclusive however there is evidence that supports there are fewer discipline problems referrals and violence as well as higher attendance rates since the implementation of a uniform policy What appears to have been overlooked in the data analysis is the effect of other programs that are often being implemented at the same time as the uniform policy and may also have a direct impact on the discipline and attendance issues There are many arguments for and against school uniform policies The pros and cons of school uniform are listed in this paper Contains 14 online resources **School Uniforms** Deborah W.
