Privatizing Welfare Services Henrik Jordahl, Mårten Blix, 2021-01-11 Focusing on health care education and elderly care *Privatizing Welfare Services* draws on extensive research on the consequences of introducing market based mechanisms to deliver welfare services Empirical evidence over the last few decades is summarized and condensed to policy lessons How to balance equity and efficiency is a central theme The book also addresses the challenges of financing the Swedish model of welfare services as well as the importance of management practices and public opinion The privatization of service production has occurred despite major political controversy between two competing visions for the welfare state Successful experiments have spread organically to neighbouring municipalities What was done well in this process and what were the mistakes The book addresses the fundamental economic challenges the trends of the future and the implications for institutional design *Access, Quality, and the Global Learning Crisis* Sarah Kabay, 2021 The global learning crisis is one of the most critical challenges facing the world today Through a case study of over 400 schools and communities in Uganda this book presents evidence that challenges the key assumption that there is a trade off between access and quality in improving

basic education around the world *PISA The Experience of Middle-Income Countries Participating in PISA 2000-2015* Lockheed Marlane, Prokic-Bruer Tijana, Shadrova Anna, 2015-11-27 This report provides a systematic review and empirical evidence related to the experiences of middle income countries and economies participating in the Programme for International Student Assessment PISA 2000 to 2015 **The Early Years** Inter-American Development Bank, Norbert Schady, 2015-10-22 This book is open access under a CC BY NC ND 3.0 IGO license The Early Years analyzes the development of Latin American and Caribbean children and makes a compelling case for government intervention in what is instinctively a family affair Spending on effective programs for young children is an investment that if done well will have very high returns while failure to implement such programs will lower the returns on the hefty investments being made in primary secondary and higher education Policies for young children belong at the core of a country's development agenda alongside policies to develop infrastructure and strengthen institutions However if the services provided or funded by governments are to benefit children they must be substantially better than what is currently being delivered in the region This book offers suggestions for improving public policy in this critical area Cyberspace in Peace and War Martin Libicki, 2016-10-15 This book is written to be a comprehensive guide to cybersecurity and cyberwar policy and strategy developed for a one or two semester class for students of public policy including political science law business etc Although written from a U.S. perspective most of its contents are globally relevant It is written essentially in four sections The first chapters 1-5 describes how compromises of computers and networks permit unauthorized parties to extract information from such systems cyber espionage and or to force these systems to misbehave in ways that disrupt their operations or corrupt their workings The section examines notable hacks of systems fundamental challenges to cybersecurity e.g. the lack of forced entry the measure countermeasure relationship including the role of malware and various broad approaches to cybersecurity The second chapters 6-9 describes what government policies can and as importantly cannot be expected to do to improve a nation's cybersecurity thereby leaving countries less susceptible to cyberattack by others Among its focus areas are approaches to countering nation scale attacks the cost to victims of broad scale cyberespionage and how to balance intelligence and cybersecurity needs The third chapters 10-15 looks at cyberwar in the context of military operations Describing cyberspace as the 5th domain of warfare feeds the notion that lessons learned from other domains e.g. land sea apply to cyberspace In reality cyberwar a campaign of disrupting corrupting computers networks is quite different it rarely breaks things can only be useful against a sophisticated adversary competes against cyber espionage and has many first strike characteristics The fourth chapters 16-35 examines strategic cyberwar within the context of state on state relations It examines what strategic cyberwar and threats thereof can do against whom and how countries can respond It then considers the possibility and limitations of a deterrence strategy to modulate such threats covering credibility attribution thresholds and punishment as well as whether denial can deter It continues by examining sub rosa attacks where neither the effects nor

the attacker are obvious to the public the role of proxy cyberwar the scope for brandishing cyberattack capabilities including in a nuclear context the role of narrative and signals in a conflict in cyberspace questions of strategic stability and norms for conduct in cyberspace particularly in the context of Sino U S relations and the role played by international law The last chapter considers the future of cyberwar

Industrial Development Report United Nations Publications,2016-01-14 This report looks at how technology and innovation achieves inclusive and sustainable industrial development ISID Its main finding is that ISID is feasible and technology can simultaneously serve all three dimensions of sustainability including economic social and environmental Rapid inclusive and sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes In some cases the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities Innovation needs to be supported by interventions strengthening the process from invention to adoption as capabilities are developed and high tech manufacturing sectors are created seeing higher rates of sustainable growth

Health Economics from Theory to Practice Simon Eckermann, 2017-03-20 This book provides a robust set of health economic principles and methods to inform societal decisions in relation to research reimbursement and regulation pricing and monitoring of performance in practice We provide a theoretical and practical framework that navigates to avoid common biases and suboptimal outcomes observed in recent and current practice of health economic analysis as opposed to claiming to be comprehensive in covering all methods Our aim is to facilitate efficient health system decision making processes in research reimbursement and regulation which promote constrained optimisation of community outcomes from a societal perspective given resource constraints available technology and processes of technology assessment Importantly this includes identifying an efficient process to maximize the potential that arises from research and pricing in relation to existing technology under uncertainty given current evidence and associated opportunity costs of investment Principles and methods are identified and illustrated across health promotion prevention and palliative care settings as well as treatment settings Health policy implications are also highlighted

The Morality of Radical Economics Ron P. Baiman, 2016-08-31 This book is in equal parts a treatise on morality and economics a critique of neoclassical orthodoxy a brief for replacing mainstream economics with a radical political economics and an argument for the abandonment of neoliberal capitalism in favor of democratic socialism It includes a detailed proposal for a demand and cost alternative to supply and demand analysis and an in depth technical critique of both neoclassical high theory and applied microeconomic analysis demonstrating that these are not only infeasible or immoral but have directly contributed to public policy disasters Further the book suggests that only a moral economics in the form of radical political economy can address the looming economic and environmental crises of today's world Baiman begins with an introduction to morality and ethics in both general sciences and in economics in particular He then guides readers through evidence of how neoclassical economics has not only failed to remain objective and value free but has become an ideology of apologetics protecting an immoral system In addition to breaking down real world examples to demonstrate his assertions Baiman analyzes a theoretical Utopia design exercise He concludes by arguing that the only form of economics that supports widely shared human values such as social equity democracy and solidarity is so called radical economics and that all true economics science should be directed toward achieving more socially productive economic activity An invaluable guide to morality and economics this book will appeal to researchers and teachers looking to

change the way we think about economics policy and society **Generation Jobless?** P. Vogel, 2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set **The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia** Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental **The Effect of Education System and School Characteristics on the Gender Gap in Competencies** Laura Zapfe, 2023-11-30 Laura Zapfe's aim is to explain how education system and school characteristics affect the gender gap in mathematics and reading competencies She adapts the macro meso micro model At the micro level she uses theories e.g. gender specific socialization highlighting how gender specific expectations and stereotypes cause gendered interest and skills and therefore gender differences in mathematics and reading Deriving a macro meso micro link she explains how education system characteristics such as competition differentiation and standardization and school characteristics could increase or decrease the gender specific socialization effects leading to larger or smaller gender gaps in mathematics and reading competencies On this basis she performs a cross national comparison of 78 countries participating in the Programme for International Student Assessment PISA 2018 combined with further researched macro data with three

level mixed effects models The results show that boys have an advantage in mathematics girls have an advantage in reading the gender effects are slightly higher for reading and the gender effects at the school level are more pronounced than those at the country level
