Proceedings Michel Verleysen, 2015      **Applying Dialogic Pedagogy** Cynthia Z. Cohen, 2018-08-15 Recent academic research criticizes the effectiveness of traditional lecturing methods and instead shows the pedagogical effectiveness of active learning methods, especially discussion-based education. Drawing on the dialogic writings of Bakhtin, Freire, and Habermas, this study reviews the five primary themes cited in active learning research: improvements in student concentration, socialization in disciplinary norms, scaffolding towards higher critical thinking, inclusion of non-traditional learning styles, and reduction of student absenteeism. Testing these findings in a discussion-based undergraduate college education classroom, this study finds significant improvements towards higher critical thinking skills, increased student concentration, and reduced student absenteeism. However, the study finds questionable effectiveness of discussion-based teaching for socializing undergraduate college education students in disciplinary norms.      **Exploring the New Era of Technology-Infused Education** Tomei, Lawrence, 2016-11-17 Recent advancements in technology have led to significant improvements and developments within learning environments.
