The Hero of Budapest Bengt Jangfeldt, 2013-11-28 The story of Raoul Wallenberg the Swedish businessman who at immense personal risk rescued many of Budapest s Jews from the Holocaust and subsequently disappeared into the Soviet prison system is one of the most fascinating episodes of World War II Yet the complete story of his life and fate can only be told now and for the first time in this book following access to the Russian and Swedish archival sources previously not used Born into a wealthy Swedish family Wallenberg was a moderately successful businessman when he was recruited by the War Refugee Board to manage the rescue mission of thousands of Hungarian Jews Once in Budapest he created and distributed so called protective passports or Schutz Pass among the Jewish population thus managing to save up to 8 000 people Through the safe houses and clandestine networks that he established around the city many thousands more were saved from the concentration camps Yet when Budapest was liberated by the Red Army in January 1945 Wallenberg was arrested and taken to Moscow One of the reasons for his arrest was that the Soviets could not understand the nature of his mission formally he was a Swedish diplomat but he worked for an American agency On the basis of previously unseen Soviet sources Jangfeldt has been able to reconstruct the events surrounding Wallenberg s arrest almost hour by hour and for the first time he presents a highly plausible theory about the reasons why Wallenberg was arrested and what happened to him after he disappeared With access to previously unpublished material Bengt Jangfeldt provides the first complete account of Wallenberg s life from his childhood in Sweden to his disappearance in a Russian jail and sheds important new light on one of the greatest heroes of World War II This is a thrilling tale of intrigue espionage and heroism which will captivate all readers of modern European history

**Integer Programming and Related Areas** C. Kastning, 2013-11-11 Integer Programing is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful

tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries
