These three dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly  
fit together to form a spectacular shape They range from paper polyhedra to bristling buckyballs that are reminiscent of sea  
urchins to ornate flower like spheres Each piece of paper is held by the tension of the other papers demonstrating the  
remarkable hidden properties of paper which is at the same time flexible but also strong Author Byriah Loper has been  
creating modular origami sculptures for just five years but in that time he s pushed the upper limits of the art form with some  
of the largest most complex geometric paper constructions ever assembled While many geo modular origami artists focus on  
creating dense floral spheres Byriah has pioneered the open linear wire frame approach which results in a very complex  
looking model that reveals the interior of its form He exhibits his sculptures annually at the Origami USA convention in New  
York and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village
