Linking Constructions into Functional Linguistics Brian Nolan, Elke Diedrichsen, 2013-12-06. There is a growing awareness of the significance of constructions in grammar in the world's languages. To date, there has not been a single volume that addresses the issues of constructions within a functional Role and Reference Grammar (RRG) account. The book is a collection of articles that will serve the scholarly community as a reference work on the role, place, and significance of constructions within this functional model of grammar. As a result, this volume represents the first instance of cross-linguistic comparison of these important discourse and syntax-related phenomena. The articles cover a variety of typologically different languages, including German, Irish, Spanish, French, Japanese, Yaqui, Tepehua, Totonacan, Persian, and English, and they offer new data on the role of constructions within the RRG theory in these languages. Further, this volume contributes towards providing a comprehensive overview of grammatical constructions which are central to our understanding of how human languages function in a functional linguistics perspective. This scholarly work is grounded in a functionally oriented model that makes strong claims of descriptive and typological adequacy. The book will represent a valuable step forward in linguistics research as it applies the RRG theoretical framework to the analyses of constructions. **Truth Be Told** Hank Phillippi Ryan, 2014-10-07. Investigating the story of a middle-class family evicted from their suburban home and on other foreclosures, reporter Jane Ryland soon learns the truth behind a scheme where the players will stop at nothing, including murder, to keep their goal a secret. **Curriculum Connections for Tree House Travelers for Grades K-4** Jane Berner, Sabrina Minser, Helen Burkart Presser, 2007-10-15.
