*Banking's Final Exam* Morris Goldstein, 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009 stress testing of large financial institutions has become the cornerstone of banking supervision worldwide The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable In Banking's Final Exam one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses leading to a false sense of reassurance about the safety and soundness of the banking system Some weaknesses can be corrected within the existing bank capital regime but others will require bold reforms including higher minimum capital requirements for the largest and most systemically important banks The banking industry is likely to resist these reforms but this book explains why their objections do not hold water

Rothman,Utpal Vyas,Yoichiro Sato,2017-04-21 This volume discusses the relationship between economics geopolitics and regional institutional growth and development in the Asia Pacific region How do states re define their relationships amid the current global power transition How do rival actors influence the rules and formation of new institutions for their own benefit What role will institutions take as independent actors in influencing and constraining the behavior of states Institutional development in Asia is characterized by idiosyncratic and diverse motivations both material and non material a variety of policy strategies strategic and norm based and the looming question of China s future depth of involvement as its economic position becomes more stable and its confidence in foreign affairs grows The book reflects the broadening definition of Asia by examining multiple perspectives including Japan China South Korea the United States Australia India Russia and Taiwan In addition to state actors the contributors address several important regional institutions in development such as the ASEAN 3 6 and the East Asian Summit the Asian Infrastructure Investment Bank AIIB the Asian Development Bank ADB existing security alliances and other bilateral institutions Ultimately this volume describes the unique slow and diverse growth of a multitude of regional institutions the complexities of generating cooperation membership concerns and competition between states and with existing institutions in the context of China s increasing confidence and strength This book will be of much interest to students of Asian politics regional security international organizations and foreign policy **Consumer Involvement in Private EU Competition Law Enforcement**

Maria Ioannidou,2015-09-03 Despite the growing importance of consumer welfare in EU competition law debates there remains a significant disconnect between rhetoric and reality as consumers and their interests still play only an ancillary role in this area of law Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject providing a timely and wide ranging examination of the need for more active consumer participation in competition law Written by an expert in the field it sets out a comprehensive framework of policy implications and arguments for greater involvement positioning the debate in the context of a broader EU law perspective It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment Finally the book identifies key institutional and political obstacles to the adoption of effective measures and suggests alternative routes to enhance the role of consumers in private competition law enforcement The book s innovative approach combining normative analysis and practical solutions make it invaluable for academics policy makers and practitioners in the field *The Dynamics of Opportunity in America* Irwin Kirsch, Henry Braun,2016-01-22 Across the

country our children are beginning life from very different starting points Some have aspirations and believe they can be achieved For too many others aspirations are tempered if not dashed by the sobering realities of everyday life These different starting points place children on distinctly different trajectories of growth and development ultimately leading to vastly different adult outcomes How did we get to a place where circumstances of birth have become so determinative And what must we do within communities and across our country to better equalize opportunity for more Americans both young and old The editors of this volume contend that if as a nation we do nothing then we will continue to drift apart placing an unsustainable strain on the nation s social fabric and the character of its democracy Consequently understanding the dynamics governing the distribution and transmission of opportunity and transforming this understanding into policies and programs is critical for not only the life outcomes of individual Americans and their children but also the country as a whole The goal of Educational Testing Service s Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action and how best to do so This volume contains 14 chapters including an epilogue written by leaders from a range of fields including education economics demography and political science Collectively they not only illuminate key aspects of the problem but also offer suggestions of what policies programs and changes in practices could begin to reverse the trends we are seeing Written in an engaging style this volume constitutes an essential foundation for informed discussion and strategic analysis
