Why Birth Control is Important: Addressing Teen Pregnancy and STD Rates

The United States ranks first in high teen pregnancy rates and sexually transmitted diseases. Since 2011, 400,000 girls between the age of 15-19 years old have given birth every year (Stanger-Hall, and Hall). So why is nothing being done about it? Why is the government putting these programs that are not helping the statistics go down in place? The Controversy of Abstinence-Only Education While some may argue abstinence-only education is the best way to keep teens and even middle schoolers from becoming pregnant and/or developing an STD. Others would argue that abstinence-only education is the main cause for the rates being as high as they are right now. They would argue that there needs to be open sex talks with teens so that in the future, they may feel comfortable enough to talk to them if need be. As a country, the awareness of the government funding abstinence-only education programs needs to become stronger, and young adults need to be educated with all possible options available. The government is funding abstinence-only sex education. Government Funding and Its Implications The U.S. government has prioritized the motto "in God we trust" over the well-being and safety of its citizens. During the term of the Obama administration, they distributed money to abstinence-only sex education programs in a more comprehensive manner. They "initially invested 110 million" (Johnson) into this approach, worrying more about the results. Now that President Donald Trump is in office, some fear that the policy may go back to the way it was before. Damaging the decline in the teen pregnancy and STD rates that the Obama administration brought down and giving it the opportunity for an increase. They were starting to see signs of cuts in the programs from the "GOP majorities in House and Senate routinely proposed cuts to the programs that provide contraceptives and screenings for HIV and sexually transmitted diseases" (Johnson), but the vote failed to pass Obama. Many low-income families depend on and have gotten a lot of help from these programs because they are cost-effective and accessible. Learning from The Netherlands While America's statistics become higher and higher due to budget cuts, the Netherlands has the smallest statistics for STDs and teen pregnancy rates. In the Netherlands, not only do they talk openly about sex in school, but they also openly talk in their homes too. Most kids start learning about their bodies at the age of four. By their teenage years, they are more focused on how to have healthy relationships while having safe sex. Since Dutch kids receive sex education earlier in life, and it is normalized day-to-day, they choose to have sex later, compared to the United States, where almost 2/3 of teens wish they had waited longer (Abraham). The Netherlands school system also teaches gender-identity issues, opening the door for those that have gender identity issues to feel more comfortable talking about it. Therefore, people think that this type of education leads to teens wanting to be more sexually active, but it does the opposite with this type of approach. Since they start educating kids at a young age, they are less susceptible to common temptations because they know all the effects and consequences that sex can have if they are not safe. Sex has different meanings for different people (Dailard). That being said, the United States is limiting its ideas on what sex education really is instead of broadening the way

Papers On Teen Pregnancy:

MTV and Teen Pregnancy Letizia Guglielmo, 2013-05-30 In 2009 *16 and Pregnant* premiered on MTV closely followed by the spinoffs *Teen Mom* and *Teen Mom 2*. Because of their controversial portrayals of teenage mothers the shows have received ongoing media attention. While some argue that the programs could play a factor in reducing the number of teen pregnancies others claim the shows exploit young women and glamorize their situations. Among these debates there have been surprisingly few in depth discourses that discuss the roles such shows have on teenage audiences. In *MTV and Teen Pregnancy: Critical Essays on 16 and Pregnant and Teen Mom* contributors from a variety of backgrounds and expertise offer potent essays about these programs. Divided into four parts the book tackles the controversial representations of teen pregnancy from various disciplines. Part I explores gendered social norms and the shows roles as either educational resources or idealized depictions of teenage motherhood. Part II prompts readers to consider the intersections of race class gender and the social and cultural power structures often glossed over in these programs. Part III focuses on teenage fathers the portrayal of masculinity and good vs bad parents. Part IV draws from TV's representations of reality to discuss the impact of these shows on the viewing audience. This section includes a narrative from a teen mother who argues that the shows do not accurately reflect the life she leads. As the debates about *16 and Pregnant* and *Teen Mom* continue this collection provides a valuable critical discourse to be used both inside and outside the classroom. Those engaged in courses on gender and women's studies as well as media studies social work and family and childhood development will find *MTV and Teen Pregnancy* especially insightful as will those involved in community outreach programs not to mention teens and young mothers themselves.

Teen Pregnancy and Parenting Lisa Frick, 2007 The writings in this anthology have been selected to introduce readers to the broadest possible spectrum of viewpoints on teen pregnancy and parenting. A question and response format prompts readers to examine complex issues from multiple angles. Debated topics include whether teenage pregnancy is a problem whether it causes negative consequences for all involved whether it helps struggling teens to succeed the role of sexual abuse and the efficacy of sex education programs.

Risking the Future National Research Council, Division of Behavioral and Social Sciences and Education, Panel on Adolescent Pregnancy and Childbearing, Commission on Behavioral and Social Sciences and Education, 1987-01-15 More than 1 million teenage girls in the United States become pregnant each year nearly half give birth. Teenage Dreams
Charlie Jeffries, 2022-06-17 Utilizing a breadth of archival sources from activists artists and policymakers Teenage Dreams examines the race and class inflected battles over adolescent women s sexual and reproductive lives in the late twentieth and early twenty first century United States Charlie Jeffries finds that most adults in this period hesitated to advocate for adolescent sexual and reproductive rights revealing a new culture war altogether one between adults of various political stripes in the cultural mainstream who prioritized the desire to delay girlhood sexual experience at all costs and adults who remained culturally underground in their support for teenagers access to frank sexual information and who would dare to advocate for this in public The book tells the story of how the latter group of adults fought alongside teenagers themselves who constituted a large and increasingly visible part of this activism The history of the debates over teenage sexual behavior reveals unexpected alliances in American political battles and sheds new light on the resurgence of the right in the US in recent years

Teenage Sexuality, Pregnancy, and Childbearing Frank F. Furstenberg, Richard Lincoln, Jane Menken, 1981 Examining the social consequences of teenage childbearing the editors explain the effects on adolescent parents themselves their offspring and their families and discuss ways of preventing or tempering those effects Why have Americans suddenly become troubled about teenage sexuality pregnancy and childbearing These are not new problems certainly and the birthrate among teenagers even the youngest of them has been declining for some years What has aroused public concern according to the editors of these essays is the increased visibility of the problem The pregnant teenager is no longer expelled from school and forced to marry or discreetly bear a child out of wedlock She has the option of abortion and even if she decides to have the child she is even more likely not to marry Thus the sensitivity of Americans to the issues of abortion and illegitimacy is inexorably linked to their concern about adolescent sexuality and pregnancy The attention focused on the problem has resulted in a considerable amount of research on the causes and consequences of teenage pregnancy and on the means of preventing it Over the past decade Family Planning Perspectives has published much if not most of the research on the causes consequences and means of coping with problems associated with teenage pregnancy and childbearing From about 100 articles the editors have selected 28 key reports that illuminate the issue for scholars students and professionals who work with young people in various settings The contributors to the first section examine historical trends in regard to teenage sexual activity use of contraception and abortion pregnancy and childbirth in and out of wedlock in the context of other changes in social structure and mores The second section assesses the serious adverse consequences of early childbearing on the young people involved on their children and on society The third section looks into what courses of action are practicable to help teenagers avert the pregnancies and births they do not wish to have and to cope with problems

resulting from early childbearing The final section evaluates current programs and materials designed to help teenagers prevent unwanted pregnancies or deal with pregnancy when it occurs it also reviews the state of the law involving contraception abortion and pregnancy among teenagers The book includes an overview and section introductions by the editors which draw together the implications of the contributions and those of other investigators who have written on this subject All articles as well as the editors contributions are followed by extensive up to date bibliographies Teenage Pregnancy Issues United States. Congress. House. Committee on Ways and Means. Subcommittee on Public Assistance and Unemployment Compensation,1985 *Unfit Subjects* Wanda S. Pillow,2004 Wanda Pillow offers an in depth examination of how schools are providing and failing to provide educational opportunities for school aged mothers in America *CHO - Model Question Paper 2023 (Part 10)* Akash Tiwari,2023-03-22
