For the New Testament and the Apocrypha the introductions and annotations by Austin Busch and Gerald Hammond provide necessary historical and cultural background while illuminating the complexity of the original texts Supporting materials are divided into five sections Historical Contexts excerpts Greek Roman and Jewish sources such as Josephus Philo Tacitus Pliny and the Dead Sea Scrolls Selections from Papias Marcion and Valentinus among others provide insight into the diversity of early Christianity Exegesis explores classic New Testament commentary from Origen and Augustine to Strauss Nietzsche Wrede and Schweitzer who focus on the Gospels vexing relationship to history Essays by contemporary scholars and critics complete the section by exemplifying a range of interdisciplinary approaches to New Testament literature The New Testament's powerful language and images have inspired some of the finest poems in the English language This volume collects a wide selection of lyric poems hymns and spirituals and epics from the Dream of the Rood to works by Countee Cullen Elizabeth Bishop and Anthony Hecht Case studies designed to stimulate classroom discussion trace the development of Pontius Pilate as a character in post biblical literature follow the centuries long exegetical debate about Romans 7 and survey competing hermeneutical approaches to Revelation A final section samples fifteen translations of 1 Corinthians 13 from Wycliffe to contemporary versions Jorge Luis Borges, Post-Analytic Philosophy, and Representation Silvia G. Dapía, 2015-08-20 Making an important contribution to studies in Literature and Philosophy this book reads Jorge Luis Borges philosophically particularly in reference to his use of representation and reality Rather than attempting to subordinate Borges to a set of philosophical constructs to reduce Borges texts to mere exemplifications or illustrations of philosophical theories the book uses Borges s short stories to demonstrate how philosophical questions related to representation develop out of literature and actually serve as precursors to the various strains of post analytic philosophy that later developed in the United States The volume discusses American post analytic philosophers Richard Rorty Hilary Putnam Donald Davidson Nelson Goodman and Arthur Danto as well as a wide ranging set of philosophical ideas including reflections on Keynes Hayek Schopenhauer and many others Chapters offer detailed readings of Borges texts extending from 1939 to 1983 locating where he thematizes issues of representation and pursuing the logic of Borges s text toward its philosophical implications without neglecting their literary value The book argues that Borges exploration of the relationship between representation and reality places him unmistakably in the position of a precursor to the post analytic philosophers Illuminating the role that language plays in the creation of reality and representation this volume makes significant contributions not only to Borges scholarship but also post structuralism post analytic studies of language semiotics comparative literature and Latin American literature The Philosophical Review Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1915 An international journal of general philosophy Ioseph Ratzinger in Dialogue with Philosophical Traditions Tracey Rowland, Alejandro Sada, Rudy Albino de Assunção, 2024-01-25 This book extensively explores the various influences and connections between Joseph Ratzinger and a number of leading

philosophers engaging with his work by means of Spanish Portuguese German and English schools of thought through the contributions of a global body of scholars Each chapter in this volume examines precisely how Ratzinger has dealt with the ideas of a particular philosopher and how he has appropriated their ideas and thoughts Moving from philosophers he has modified or critiqued such as Kant Comte or Wittgenstein to those who have contributed to his philosophical theology such as Guardini and Pieper this truly international endeavour is an extraordinary journey into Ratzinger's engagement with his competing and congenial schools of thought Encyclopedia of Renaissance Philosophy Marco Sgarbi, 2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650 **Philosophy without Foundations** William Maker, 1994-10-11 Maker philosophy Clemson U contends that Hegel's philosophy is not consummately foundational and absolutist but rather a nonfoundational philosophy which incorporates some contemporary criticisms of foundationalism without abandoning philosophy s traditional goal of offering demonstrable objective truth Paper edition unseen 19 95 Annotation copyright by Book News Inc Portland OR **Experimental Philosophy and the Birth of Empirical Science** Michael Ben-Chaim, 2017-03-02 How did empirical research become the cornerstone of modern science Scholars have traditionally associated empirical research with the search for knowledge but have failed to provide adequate solutions to this basic historical problem This book offers a different approach that focuses on human understanding rather than knowledge and its cultural expression in the creation and social transaction of causal explanations Ancient Greek philosophers professed that genuine understanding of a particular subject was gained only when its nature or essence was defined This ancient mode of explanation furnished the core teachings of late medieval natural philosophers and was reaffirmed by early modern philosophers such as Bacon and Descartes Yet during the second half of the 17th century radical transformation gave rise to innovative research practices that were designed to explain how empirical properties of the physical world were correlated The study unfolded in this book centres on the works of Robert Boyle John Locke and Isaac Newton the most notable exponents of the experimental philosophy in the late 17th century to explore how this transformation led to the emergence of a recognizably modern culture of empirical research Relating empirical with explanatory practices this book offers a novel solution to one of the major problems in the history of western science and philosophy It thereby provides a new perspective on the Scientific Revolution and the origins of modern empiricism At the same time this book demonstrates how historical and sociological tools can be combined to study science as an evolving institution of human understanding The Saturday Review of Politics, Literature, Science, Art, and Finance 1860 Psychic Research Quarterly, 1929 **Psyche** 

Charles Kay Ogden, 1929 Includes section Current literature Bentham's Theory of Fictions C.K. Ogden, 2013-10-28 This is Volume VI of eight in a series on the Philosophy of Mind and Language Originally published in 1932 Bacon Hobbes Locke Berkeley Hume to his five great predecessors Bentham acknowledges his debt It is the purpose of the present volume to give some indication of the debt which future generations may acknowledge to Jeremy Bentham when he has taken his place as sixth in the line of the great tradition and in some respects its most original representative A History of Philosophy: Hobbes to Hume Frederick Charles Copleston, 1959 Jeremy Bentham Bhikhu C. Parekh, 1993 **Ways of Being** Bound: Perspectives from post-Kantian Philosophy and Relational Sociology Patricio A. Fernández, Alejandro Néstor García Martínez, José M. Torralba, 2022-11-01 This book addresses the topic of being bound from a philosophical and a sociological perspective It examines several ways in which we are bound We are bound to acknowledge the truth and to follow laws we are bound to others and to the world Who we are is partly defined by those bonds regardless of whether we live up to them or even of whether we acknowledge them Puzzling questions arise from the fact that we are bound such as How are those bonds binding Wherein lies their normative character A venerable philosophical tradition particularly since Kant has provided an account of normativity that crucially appeals to such notions as self legislation But can our normative bonds be properly understood in these essentially first personal terms Many argue that our social condition resists any account of those bonds that fails to acknowledge the perspectives of the second and the third person The first part of the book explores these themes from a historical perspective in the tradition of transcendental philosophy Kant Fichte Hegel Husserl and Heidegger it examines the phenomenon of being bound i e why and how we are bound The second part of the book offers a sociological analysis of social bonds that is both historical and systematic Based on sociological approaches to solidarity and reflexivity it explores the way in which the phenomenon of being bound manifests through the concept of a social relation Philosophical Papers Peter K. Unger, 2006-03-02 Collected in two volumes this work includes articles spanning over 40 years of philosopher Peter Unger's long career Dividing the articles thematically this first volume collects work in epistemology and ethics among other topics while the second volume focuses on metaphysics
