Encyclopedia of Nineteenth-Century Photography

John Hannavy,2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of

world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates, and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers, and libraries worldwide. Popular Photography - ND, 1946-10 **Official Record**, 1882

Popular Photography - ND, 1957-02 **The Photographic News: A Weekly Record of the Progress of Photography**. Ed. by William Crookes, and by G. Wharton Simpson. William Crookes, 1862 American Photography, 1924 **Photography, Architecture, and the Modern Italian Landscape**. Lindsay Harris, 2024-11-19. **Photography, Architecture, and the Modern Italian Landscape** explores the impact of photography at a pivotal moment in Italian architecture and culture, focusing on the period between 1910 and the mid 1970s. The book analyzes architectural photographs taken by Italian cultural figures who helped transform the Italian landscape into what we know today. This study charts the oscillation of Italians' ideas about what progress signified. For example, the book demonstrates that for writers and artists familiar with ancient ideas about civilization, in 1910 the Roman countryside exemplified the contradictions inherent in primitivism. On the one hand, their photographs praised the region's primordial beauty, yet their images condemned the crudeness of local living conditions. More broadly, it traces the history of primitivism and photography in Italy to show how cultural leaders' alarm at the nation's pre-modern living conditions, their aspiration to modernize them, and their grasp of photography to catalyze the process helped forge the modern Italian landscape, its monuments, housing, infrastructure, and natural environments. At the same time, it explores a vibrant period in photographic history when the advent of photographic reproduction as a commercial process developed into a medium with its own visual style, capable of shaping ideas about modernity. This new image-making and reproduction technology empowered Italy's cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed. Of interest to researchers and students from a range of disciplines, modern architecture, photography, and Italian studies, this book demonstrates the power of art to transform society and to reformulate our ideas of progress. **Photography**, 1892
