bridges landfills and a complex network of road and railway bridges In 1929 Boston's first major highway controversy erupted when a four lane road was proposed as part of a new esplanade At twenty year intervals three riverfront road disputes followed successively more complex and disputatious culminating in the lawsuits over Scheme Z the Big Dig's plan for eighteen lanes of highway ramps and bridges over the river More than four hundred photographs maps and drawings illustrate past and future visions for the Charles and document the river's place in Boston's history A New Nation of Goods David Jaffee, 2010 A New Nation of Goods highlights the significant role of provincial artisans in four crafts in the northeastern United States chairmaking clockmaking portrait painting and book publishing to explain the shift from preindustrial society to an entirely new configuration of work commodities and culture **Photography and social movements** Antioni Memou, 2018-02-28 Now available for the first time in paperback Photography and social movements is the first thorough study of photography's interrelationship with social movements Focusing on photographic production and dissemination during the student and worker uprising in Paris in May 1968 the Zapatista rebellion and the anti capitalist protests in Genoa in 2001 the book argues that at times of political uprisings photographic documentations often contradictory strive to prevail in the public domain extending the political or economic struggle to a representational level Photography plays a central role in this representational conflict by either reproducing or challenging stereotypical narratives of protest This groundbreaking interdisciplinary analysis of a wide range of practices amateur and professional and of previously unpublished archival material will add considerably to students researchers and scholars knowledge of both the visual imagery of political movements and the developing history of photographic representation
