Photogrammetry of a 5m Inflatable Space Antenna with Consumer Digital Cameras Richard S. Pappa,2000 This paper discusses photogrammetric measurements of a 5m diameter inflatable space antenna using four Kodak DC290 2 1 megapixel digital cameras The study had two objectives 1 Determine the photogrammetric measurement precision obtained using multiple consumer grade digital cameras and 2 Gain experience with new commercial photogrammetry software packages specifically PhotoModeler Pro from Eos Systems Inc The paper covers the eight steps required using this hardware software combination The baseline data set contained four images of the structure taken from various viewing directions Each image came from a separate camera This approach simulated the situation of using multiple time synchronized cameras which will be required in future tests of vibrating or deploying ultra lightweight space structures With four images the average measurement precision for more than 500 points on the antenna surface was less than 0 020 inches inplane and approximately 0 050 inches out of plane

Guide to Graphics Software Tools Jim X. Chen,2007-08-23 Many scientists in different disciplines realize the power of graphics but are also bewildered by the complex implementations of a graphics system and numerous graphics tools More often than not they choose the wrong software tools and end up with unsatisfactory results Hopefully if we know how a graphics system works and what basic functions many graphics tools provide we can understand and employ some graphics tools without spending much precious time on learning all the details that may not be applicable and we can become graphics experts through such a shortcut Overview This book aims to be a shortcut to graphics theory programming tools and applications It covers all graphics basics and several advanced topics without including some implementation details that are not necessary in graphics applications It categorizes current graphics tools according to their applications and provides many weblinks to important resources on the Internet The purpose is to provide an exhaustive list of graphics tools with their major applications and functions The reference list may contain some inaccuracies since new tools are constantly emerging VI Preface and old tools become obsolete Through explaining and categorizing these graphics tools and their primary applications we hope to provide learners and researchers with different means and application areas in computer graphics and help them understand and use visualization modeling animation simulation virtual reality and many online resources

Applications of 3D Measurement from Images John Fryer,Harvey Lawson Mitchell,Jim H. Places Robin Letellier,Rand Eppich,2015-12-22 This two volume guide provides a comprehensive overview of the fundamental principles and guidelines for documenting cultural heritage places It seeks to aid heritage managers and decision makers in understanding their roles and responsibilities in this essential activity Volume 1 Guiding Principles explains why heritage managers must make sure that heritage information fully integrated into all research investigation and conservation activities Through the discussion of basic principles benefits and new approaches it assists those in charge of preserving immovable cultural heritage by bringing current heritage information practices to a new level By recording we create a reference for evaluating change and add to the understanding of a site By documenting we guarantee that information is systematically collected and preserved for future use By managing the information we make it available and

provide a basis for sharing our knowledge and understanding Volume 2 presents illustrated examples from around the world Good documentation of a site allows for better understanding of the site s value Recognizing value and significance is often the first step toward a site s eventual conservation The information obtained through the documentation process allows conservation professionals to record current conditions consider appropriate conservation options plan interventions apply treatments and finally measure the results of their efforts Documentation can be a tool in resolving a conservation issue This volume presents several illustration examples from around the world in various stages of conservation

Automotive Accident Reconstruction Donald E. Struble, John D. Struble, 2020-01-24 This fully updated edition presents practices and principles applicable for the reconstruction of automobile and commercial truck crashes Like the First Edition it starts at the very beginning with fundamental principles information sources and data gathering and inspection techniques for accident scenes and vehicles It goes on to show how to analyze photographs and crash test data The book presents tire fundamentals and shows how to use them in spreadsheet based reverse trajectory analysis Such methods are also applied to reconstructing rollover crashes Impacts with narrow fixed objects are discussed Impact mechanics structural dynamics and conservation based reconstruction methods are presented The book contains a comprehensive treatment of crush energy and how to develop structural stiffness properties from crash test data Computer simulations are reviewed and discussed Extensively revised this edition contains new material on side pole impacts It has entirely new chapters devoted to low speed impacts downloading electronic data from vehicles deriving structural stiffness in side impacts and incorporating electronic data into accident reconstructions

Lasers in the Conservation of Artworks Johann Nimmrichter, Wolfgang Kautek, Manfred Schreiner, 2009-08-09 Over the last decades the use of lasers in artwork conservation has become an important tool for many conservators scientists architects and other experts who are involved in the care of monuments and artefacts or applied laser technology Professor Costas Fotakis first brought together restorers and scientists in 1995 to discuss the potential of lasers in art conservation The field of Lasers in the Conservation of Artworks has since gained considerably in importance and nowadays restorers and laser scientists work closely together to develop new applications Furthermore a large number of national and international research projects have been carried out by conservator restorers architects and scientists In the last 10 years historical and artistically high quality monuments e g St Stephens Cathedral in Vienna have been cleaned or measured by laser and this has established the laser in the spectra of tools that are useful in the practical realm of artworks The proceedings of the 2005 congress addresses scientists conservator restorers companies architects decision makers and other experts involved in conservation projects or in the research of new laser equipment
