

Photosynthesis Exam-Style Questions **Answers**

1. Complete the word equation for photosynthesis:

What type of energy is transferred in photosynthesis? **light energy**

What is the source of this energy? **the sun**

A student places a plant into a dark cupboard and partially covers one leaf (**leaf A**) with a piece of card. After two days, she carries out a test for starch on **leaf A** and on one other leaf (**leaf B**), as shown below.

When iodine is added to **leaf B**, it turns completely blue/black.

2. Which parts of **leaf A** would turn blue/black?

Shade these areas on the leaf below and explain your answer.

The card stops the light from getting to the leaf and therefore the leaf cannot photosynthesise. This means only the uncovered areas will contain starch and will therefore turn blue/black.
