Cybercrime Industry Nir Kshetri, 2010-06-25 The Internet's rapid diffusion and digitization of economic activities have led to the emergence of a new breed of criminals. Economic, political, and social impacts of these cyber criminals' activities have received considerable attention in recent years. Individuals, businesses, and governments rightfully worry about the security of their systems, networks, and IT infrastructures. Looking at the patterns of cybercrimes, it is apparent that many underlying assumptions about crimes are awed, unrealistic, and implausible to explain this new form of criminality. The empirical records regarding crime patterns and strategies to avoid and fight crimes run counter to the functioning of the cyberworld. The elds of hacking and cybercrime have also undergone political, social, and psychological metamorphosis. The cybercrime industry is a comparatively young area of inquiry. While there has been an agreement that the global cybercrime industry is tremendously huge, little is known about its exact size and structure. Very few published studies have examined economic and institutional factors that influence strategies and behaviors of various actors associated with the cybercrime industry. Theorists are also debating as to the best way to comprehend the actions of cyber criminals and hackers and the symbiotic relationships they have with various players.

COVID-19 and Marginalisation of People and Places Borna Fuerst-Bjeliš, Etienne Nel, Stanko Pelc, 2022-10-03 This book examines how COVID-19 has often enhanced social and economic marginalisation in different places and societies around the world. It explores the reality that selective deglobalisation is occurring and over and above the human tragedy which has been experienced, many societies and economies have had to adapt to the new reality which they find themselves in. Governments have been challenged to improve health care and provide economic relief and stimulus packages to sectors as diverse as tourism and education which have had to develop new ways of coping. Resilience theory is drawn on to help explain some of the creative responses which we observe while in other places deep-rooted concerns for the future are a stark reality. By describing how the pandemic has exacerbated pre-existing geographic, social, and economic marginalisation, particularly for the most vulnerable places, societies, and economic activities globally, this book provides insight into the impacts and implications across the world and reflects on the different experiences.

Censored Landscapes Isabella La Rocca

González, 2024-11-12 **Censored Landscapes** unveils the hidden reality of farming animals offering a powerful and emotionally charged exploration. Photographs, essays, poetry, and research together tell a factual story about the most abusive industry of the twenty-first century. Isabella La Rocca González's lens captures the haunting beauty of landscapes that portray the animal agricultural industry. A number displayed with each image represents the lives imprisoned within the facility, drawing attention to the magnitude of suffering behind the banal exteriors. Portraits of nonhuman animals who have been confined in such facilities are emblematic of the vast number of animals whose individuality, sentience, and beauty are obliterated by the industry. **Censored Landscapes** maintains a lyrical quality through evocative photographs, poetry, and personal narrative. The project also provides a robust basis in verifiable facts and scientific research. Readers are encouraged to confront the intricate web of connections between animal agriculture, animal suffering, environmental devastation, worker exploitation, human health, economic, political structures, and social justice. This book is a call to action, a revelation of the invisible, and an opportunity to see, feel, and make a difference.
