Lone Actors - An Emerging Security Threat A. Richman,Y. Sharan,2015-11-17 Terrorist attacks perpetrated by lone actors have already occurred in several countries and this phenomenon is emerging as a threat to the security of both NATO members and other countries worldwide In this context a lone actor or lone wolf is someone who individually prepares or commits violent acts in support of an ideology group or movement but who is acting outside of the command structure and without the assistance of any group Up to now these individual acts have been seen as almost impossible to forecast but it is nevertheless important to develop a responsible security policy which takes them into account and incorporates planning for counteraction prevention and response This book presents papers written by leading experts in the field which reflect the subjects presented at the workshop Lone Actors An Emerging Security Threat part of the NATO Science for Peace and Security Programme held in Jerusalem in November 2014 The papers are divided into five sections the threat of lone actor terrorism case studies countering and responding to the threat legal and ethical aspects and foresight and policy aspects The insights information and recommendations shared in this book will be of interest to all those involved in developing a more efficient response policy to this emerging threat

Trauma Team Dynamics Lawrence Marshall Gillman,Sandy Widder,2025-09-12 The majority of medical errors are non technical in nature stemming from faulty decision making asynchronous information gathering lack of situational awareness and ineffective communication and team leadership Reviews of accidents from other high risk industries including the airline industry have had similar findings This led the National Aeronautics and Space Administration NASA and the airline industry to develop crew now crisis resource management CRM training These team based training strategies address non technical skills to counteract human error and improve team and patient safety Medicine has begun adapting this training especially within the realms of anesthesia and

critical care Trauma surgery has been slower to utilize this work however simulation based training is increasing in popularity The first edition of Trauma Team Dynamics was a revolutionary book in the field of trauma care It was the first text that integrated the complexities of trauma care but illustrated how these could be streamlined and improved through a team based focus and training CRM and team based training has grown substantially in the past six years since this text was conceived and there have been significant developments both in the breadth of the training as well as refinement in the topics covered teaching methods utilized and strategies employed to overcome the multitude of challenges still faced in this area The second edition of this text expands greatly on the initial CRM topics covered in the opening section of the book Hot topics in CRM training including the concepts of followership and conflict resolution and highlights strategies such as mindfulness and others to manage stress and reduce burnout are discussed The text also expands into novel areas of trauma care including less invasive bedside endovascular treatments such as REBOA Resuscitative Endovascular Balloon Occlusion of the Aorta and a more in depth discussion of teleresuscitation and trauma care in austere environments Featuring 28 new chapters the second edition of Trauma Team Dynamics is written by experts in trauma critical care emergency medicine nursing respiratory therapy and pre hospital care and include NASA and United States military affiliated experts It is intended for use as both a day to day clinical resource and a reference text and includes self assessment questions as well as guidance on CRM curriculum design and implementation Anesthesia for Trauma Corey S. Scher, 2014-08-28 Trauma is the leading cause of death among people under the age of 40 and it ranks third for all age groups Still relatively few clinicians specialize in trauma and training is often obtained through experience The number of trauma patients is expected to continue to grow as pre hospital care continues to advance As well hospitals increasingly see trauma treatment which requires no pre approval as a good source of revenue Given these developments the number of opportunities for specialists trained in trauma including anesthesiologists and critical care physicians will expand in the years ahead This book addresses the need for an up to date comprehensive and clinically focused volume for practitioners and trainees in trauma anesthesia and critical care It is organized by organ system The editor is an attending physician at a major urban hospital center recognized worldwide for its outstanding emergency medical services including trauma care and is recruiting leading trauma anesthesiologists to contribute Anesthesiologists pain medicine physicians critical care physicians and trainees are the target audience *Sanders' Paramedic Textbook* Mick J.
