Response Ap Macroeconomics 1997:

Debates in Macroeconomics from the Great Depression to the Long Recession Arie Arnon, 2022-05-06 This book assesses major schools of thought in macroeconomic theory between the Great Depression and the Long Recession focusing on their analysis of cycles crises and macro policy It explores the road from the dominance of Keynesian ideas to those of New Classical Macroeconomics NCM toward the end of the millennium The book covers the early influential work of Knut Wicksell the economic debates of the 1930s with core contributions from John Maynard Keynes and Friedrich von Hayek the rise of Keynesianism in the 1950s and its decline since the 1970s the rise of Monetarism in the 1960s and NCM s subsequent rise to prominence Finally the book outlines how macroeconomics has evolved from its birth in the 1930s as a theory separate from microeconomics resulting in a split between macro and micro theories and ended up with a new hegemonic paradigm based on microfoundations The ensuing policy thinking witnessed a transformation from active macro policy after the Great Depression to a far more passive macro policy during the last quarter of the twentieth century which may have contributed to missing the signs of the impending Long Recession of 2008 When the 2008 crisis struck macroeconomists were caught with models that were theoretically elegant yet inappropriate to the needs of the moment A broader historical perspective may have prevented the jettisoning of Keynesian models that had proved useful in the past and might have done so again This highly readable book by Arie Arnon is a wonderful antidote to economists short time horizon and contributes mightily to restore the profession s collective memory of the diversity of ideas within macroeconomics Professor Dani Rodrik Harvard Kennedy School

Local Responses to Global Integration Charlabos Kasimis, Apostolos G. Papadopoulos, 2018-12-20 First published in 1999 this volume features articles from 19 contributors on local responses to global integration with a focus on rural areas and their adoption of new functions as both producers and consumers It responds to a crisis in the regulatory framework and reconsiders globality revealing new forms of production and consumption developing in diverse ways amongst these global rural communities Authors from Australia Bulgaria Finland Greece Ireland the Netherlands Poland Sweden the United Kingdom and Venezuela are represented

The Dynamic Macroeconomic Effects of Public Capital Christophe Kamps, 2004-12-22 This book analyzes the dynamic macroeconomic effects of public capital in industrialized countries The issue of whether public capital is productive has received a great deal of recent attention Yet existing empirical analyses have been limited to a small set of countries This book presents a new database that provides internationally comparable capital stock estimates for 22 OECD countries for the 1960 2001 period Building on this database the book estimates the dynamic effects of public capital using a variety of econometric methods The results suggest that public capital is productive in OECD countries on average The theoretical analysis based on a dynamic general equilibrium model shows that the effects of public capital depend crucially on the way the government chooses to finance additional spending

Polymer Composites, Macro- and Microcomposites Sabu Thomas, Kuruvilla Joseph, S. K. Malhotra, Koichi
