Psychological Responses to Violations of Expectations: Perspectives and Answers from Diverse Fields of Psychology

Mario Gollwitzer, Anna Thorwart, Karin Meissner, 2018-03-19 From Pavlov's dog expecting food when hearing a bell to stereotypes as expectations about other people's behaviour from Bandura's self-efficacy as expectation for success and failure of one's own behaviour to the predictive brain concept in current perception theories expectations have been a central construct in different areas of psychological research. In each of these areas specific concepts, theoretical approaches and empirical methods have been developed to explain when and why expectations persist and when they do not. Many theories assume that expectations are likely to change in the face of disconfirming evidence. However, sometimes expectations persist even though they are empirically violated, suggesting that they can be sticky under certain circumstances. But what are these circumstances? And what are the psychological mechanisms that can explain why and when expectations persist or change after being confronted with expectation violating evidence? Each contribution of the current book offers insights into individuals' reactions to violations of expectations. They show that many pieces of the puzzle have been collected in the many sub-disciplines of psychology and that putting them together in an integrative fashion stays a fascinating enterprise.

2004 Recent Developments in Alcoholism Marc Galanter, 2013-11-21 From the President of the American Society of Addiction Medicine *Recent Developments in Alcoholism* Volume 10 is a major contribution to the literature of addiction medicine. This volume on alcohol and cocaine similarities and differences contains an impressive collection of chapters from the basic research, epidemiological and clinical research perspectives as well as articles that address the relative policy issues and clinical application and patient care concerns. It also sends a message to those who would still distinguish between alcohol and drugs or legal and illegal drugs. In the research laboratory in the intentions and behavior of the user and by the clinician such distinctions have never been upheld. The first section Clinical Pathology includes chapters on the role of alcohol in cocaine dependence, dual diagnosis, empirical and developmental, humanistic approaches and on neuroendocrine and catecholamine levels in humans during administration and withdrawal of cocaine and alcohol, emergency room evaluation of cocaine associated neuropsychiatric disorders and clinical and pharmacological interactions of alcohol and cocaine. These chapters written by authors who are preeminent in their fields offer a broad perspective to both the researcher and the clinician on relevant issues in clinical pathology.
