Handbook of Research on Building Information Modeling and Construction Informatics: Concepts and Technologies

Underwood, Jason, Isikdag, Umit, 2009-12-31 In recent years building information modeling has become a very active research area of construction informatics with investigation of ICT use within construction industry processes and organizations The Handbook of Research on Building Information Modeling and Construction Informatics Concepts and Technologies addresses the problems related to information integration and interoperability throughout the lifecycle of a building from feasibility and conceptual design through to demolition and recycling stages Containing research from leading international experts this Handbook of Research provides comprehensive coverage and definitions of the most important issues concepts trends and technologies within the field

BIM Handbook Charles M. Eastman, 2011-04-19 The BIM Handbook presents the technology and processes behind BIM and how architects engineers contractors and sub contractors construction and facility owners AECO can take advantage of the new technology and work process Unlike CAD BIM is a major paradigm shift in the documentation work processes and exchange of project information It facilitates collaboration and further automation in both design and construction AEC professionals need a handbook to guide them through the various BIM technologies and related processes The collaborative nature of BIM requires professionals to view BIM from various industry perspectives and understand how BIM supports multiple project participants The BIM Handbook reviews BIM processes and tools from multiple perspectives the owner architects and engineers contractors subcontractors and fabricators

health safety and wellbeing in the construction industry *Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World* Georgios Anagnostou, Andreas Benardos, Vassilis P. Marinos, 2023-04-12

Expanding Underground Knowledge and Passion to Make a Positive Impact on the World contains the contributions presented at the ITA AITES World Tunnel Congress 2023 Athens Greece 12-18 May 2023. Tunnels and underground space are a predominant engineering practice that can provide sustainable, cost-efficient and environmentally friendly solutions to the ever-growing needs of modern societies. This underground expansion in more diverse and challenging infrastructure types or to novel underground uses can foster the changes needed. At the same time, the tunneling and underground space community needs to be better prepared and equipped with knowledge, tools and experience to deal with the prevailing conditions to successfully challenge and overcome adversities on this path. The papers in this book aim at contributing to the analysis of challenging conditions, the presentation and dissemination of good practices, the introduction of new concepts, new tools and innovative elements that can help engineers and all stakeholders to reach their end goals.

Expanding Underground Knowledge and Passion to Make a Positive Impact on the World covers a wide range of aspects and topics related to the whole chain of the construction and operation of underground structures: Knowledge and Passion to Expand Underground for Sustainability and Resilience, Geological Geotechnical Site Investigation and Ground Characterization, Planning and Designing of Tunnels and Underground Structures, Mechanised Tunnelling and Microtunnelling, Conventional Tunnelling, Drill and Blast Applications, Tunnelling in Challenging Conditions, Case Histories and Lessons Learned, Innovation, Robotics and Automation, BIM, Big Data and Machine Learning Applications in Tunnelling, Safety, Risk and Operation of Underground Infrastructure and Contractual Practices, Insurance and Project Management. The book is a must-have reference for all professionals and stakeholders involved in tunneling and underground space development projects.

BIM and Construction Management Brad Hardin, Dave McCool, 2015-05-28

A sleeker, more comprehensive approach to construction projects, *BIM and Construction Management* Second Edition is a complete integration guide featuring practical advice, project-tested methods and workflows and tutorials for implementing Building Information Modeling and technology in construction. Updated to align with the latest software editions from Autodesk, Trimble and Bentley, this book provides a common-sense approach to leveraging BIM to provide significant value throughout a project's life cycle. This book outlines a results-focused approach which shows you how to incorporate BIM and other technologies into all phases of construction management such as Project planning, Set up the BIM project to succeed right from the start by using the right contracts, the right processes and the right technology, Marketing: How to exceed customer expectations and market your brand of BIM to win, Pre-construction: Take a practical approach to engineer out risks in your project by using the model early to virtually build and analyze your project prior to physical construction, Construction: Leverage the model throughout construction to build safer and with better quality, Field work: Learn how mobile technologies have disrupted the way we work in the field to optimize efficiencies and access

information faster Closeout Deliver a better product to your customer that goes beyond the physical structure and better prepares them for future operations Additionally the book provides a look at technology trends in construction and a thoughtful perspective into potential use cases going forward BIM and Construction Management Second Edition builds on what has changed in the construction landscape and highlights a new way of delivering BIM enabled projects Aligning to industry trends such as Lean integrated delivery methods mobile platforms and cloud based collaboration this book illustrates how using BIM and technology efficiently can create value

Collaboration and Integration in Construction, Engineering, Management and Technology Syed M. Ahmed, Paul Hampton, Salman Azhar, Amelia D. Saul, 2020-12-21 This book gathers papers presented at the 11th International Conference on Construction in the 21st Century held in London in 2019 Bringing together a diverse group of government agencies academics professionals and students the book addresses issues related to construction safety innovative technologies lean and sustainable construction international construction improving quality and productivity and innovative materials in the construction industry In addition it highlights international collaborations between various disciplines in the areas of construction engineering management and technology The book demonstrates that as the industry moves forward in an ever complex global economy multi national collaboration is crucial and its future growth will undoubtedly depend on international teamwork and alliances

Design and Construction of Smart Cities Ibrahim El Dimeery, Moustafa Baraka, Syed M. Ahmed, Amin Akhnoukh, Mona B. Anwar, Mahmoud El Khafif, Nagy Hanna, Amr T. Abdel Hamid, 2021-01-23 This book focuses on how to maintain environmental sustainability as one of its main principles and it addresses how smart cities serve to diminish wastes and maintain natural resources by having clean green energy that is operated by new smart technology designs Living in a smart city is not something of the future anymore it is here and it is being implemented all over the world A smart city uses different types of electronic Internet of things IoT sensors to collect data and then use these data to manage assets and resources efficiently The smart city concept integrates information and communication technology ICT and various physical devices connected to the IoT network to optimize the efficiency of city operations and services and achieve sustainable solutions to allow us to grow with proper management of our resources Smart sustainable structures and infrastructures face the need of urban areas due to the growth of populations while in the same time save our environment To achieve this we need to revisit the conventional methods in design and construction and the conventional materials which are used now to optimize the design and provide smart solutions In the past few years the consumption of resources has been massive and the waste produced from that consumption has been inconceivable This is causing environmental degradation which produces many environmental challenges such as global climate change excessive fossil fuel dependency and the growing demand for energy As well as discussing the challenges facing the civil engineering design and construction of smart cities components and presenting concepts and insight from experts and researchers from different civil engineering disciplines this book explains how to

construct buildings and special structures and how to manage and monitor energy **Proceedings of the 28th International Symposium on Advancement of Construction Management and Real Estate** Dezhi Li, Patrick X. W. Zou, Jingfeng Yuan, Qian Wang, Yi Peng, 2024-11-27 This book presents the proceedings of CRIOCM 2023 sharing the latest developments in real estate and construction management around the globe The conference was organized by the Chinese Research Institute of Construction Management CRIOCM and Southeast University Written by international academics and professionals the proceedings discuss the latest achievements research findings and advances in frontier disciplines in the field of construction management and real estate covering a wide range of topics including new theory and practice of engineering management smart construction and maintenance green low carbon building and sustainable development big data and blockchain construction and real estate economy real estate finance and investment real estate management and housing policy innovative theory and practice of urban governance land use and urban planning and other related issues The discussions provide valuable insights into the implementation of advanced construction project management and real estate market in China and abroad The book offers an outstanding resource for academics and professionals *Proceedings of the Canadian Society for Civil Engineering Annual Conference 2023, Volume 4* Serge Desjardins, Gérard J. Poitras, Mazdak Nik-Bakht, 2024-09-17 This book comprises the proceedings of the Annual Conference of the Canadian Society for Civil Engineering 2023 The contents of this volume focus on the specialty track in construction with topics on modular and offsite construction BIM construction planning and project management construction automation AI and robotics in construction sustainable construction asset management and construction safety among others This volume will prove a valuable resource for researchers and professionals **Proceedings of the 5th International Conference on Water Resources (ICWR) - Volume 1** Sobri Harun, Ilya Khairanis Othman, Mohamad Hidayat Jamal, 2022-10-12 This book comprises selected proceedings of the 5th International Conference on Water Resources 2021 ICWR2021 focusing on innovations and preparations to face the water related challenges Focus is given in the area of quantitative and qualitative water resource analyses comprising of forecasting modelling and water governance The contents will be useful to researchers educators practitioners and policy makers alike **BIM for Building Owners and Developers** K. Pramod Reddy, 2012-01-03 Use BIM to develop strategies expedite projects improve outcomes and save money BIM is far more than an upgrade to the latest CAD software It is a process improvement tool that leverages data to analyze and predict outcomes throughout the different phases of the building life cycle The time for a building owner to get involved with the BIM process is not at the end of the building project but from the very beginning BIM for Building Owners and Developers is the only guide that will help you the owner and client use BIM to increase transparency and create a more integrated design and construction process which will result in better quality buildings at lower cost and in a shorter time frame It will also help you understand what BIM can do for you and what you can expect in terms of process and commitments You ll discover how BIM can help improve your

strategic planning maximize ROI support the decision making processes and fine tune GAP analysis In addition BIM for Building Owners and Developers can help you Understand manage and take advantage of the BIM paradigm shift Assemble a building as it would be constructed on site to help eliminate many inefficiencies of the construction process Achieve a high level of coordination through better integration of information and process optimization Reduce the overall cost of a project by identifying problems while they still can be corrected inexpensively Make every project easier faster and more profitable with BIM for Building Owners and Developers *Shaping the Future of Design and Build in Interior Fitouts*

Mayannk,2025-03-18 This book explores the future of interior fitouts examining and adapting to create dynamic and human centered workspaces It delves into key trends to enhance user experience The book provides valuable insights to navigate the complexities of the modern fitout market and deliver successful projects that meet the evolving needs of businesses and occupants embracing innovation and prioritizing human well being the industry can shape the future of work and create spaces that inspire and support productivity **Proceedings of Conference on Sustainable Traffic and Transportation Engineering in 2023** Andrii Bieliatynskiy,Dmytro Komyshev,Wen Zhao,2024-07-30 This open access book discusses modern cutting edge techniques and theoretical research in the domain of transportation engineering As China s Belt and Road Initiative BRI gains momentum over these years the construction of transport routes between China and its neighboring countries has seen an unprecedented rise which draws increased attention from researchers to the theoretical advances and technological innovation in the construction of transportation facilities It will be an invaluable asset for the development of transport infrastructure construction technologies worldwide Among the landmark engineering projects in the initiative are the Piraeus Port in Greece the 100 MW photovoltaic power plant in Hungary Kauposberg and the Monnet Railway in Kenya each of which stands out with its innovative highlights in theoretical research and technological advances The book is expected to share with global experts and engineers in the field of transportation advanced research results and technologies in construction from China discuss new research topics and explore feasible solutions in the realm of transportation engineering The main topics discussed in this book include a New theories and technologies for the construction of roads railroads subways airports bridges tunnels and other infrastructure b Advanced theories and technologies for the construction of ports dams reservoirs sluices hydraulic tunnels canals and other infrastructure c Novel materials and innovative application of these materials to the construction of transportation facilities This book is intended for graduate and doctoral students experts and engineers in the field of transportation engineering *Ship & Boat International* ,2002
