Further, this book includes contributions from leading scholars in testing and quantitative, qualitative and mixed methods research and results reporting. The volume is organized into four sections. Section I provides a rationale for this volume, namely that including visual displays in research and testing can enhance comprehension and processing efficiency. Section II includes addresses theoretical frameworks and universal design principles for visual displays. Section III examines the use of visual displays in quantitative, qualitative and mixed methods research. Section IV focuses on using visual displays to report testing and assessment data.
