Evidence-based Management of Lipid Disorders Maud N Vissers,,John JP Kastelein,,Erik S Stroes,2010-09-01 Practising evidence based medicine necessarily depends on the clinician having access to the best evidence available but in a fast moving field keeping up to date with the latest developments is a challenging prospect In this new volume leading experts focus on the most important clinical issues associated with the management of lipid disorders evaluating and interpreting the evidence available to provide the reader with a reliable summary of our current knowledge Topics covered include therapeutical strategies for managing hereditary lipid disorders including familial hypercholesterolemia both in adults and children and familial combined hypercholesterolemia The authors also evaluate the evidence for a link between inflammatory disease and cardiovascular risk the metabolic syndrome and the interconnections between dyslipidemias and diabetes They also look at therapeutic challenges such as the management of patients who are statin resistant and the control of lipid levels in those suffering renal insufficiency Tables highlight important data evidence from trial results and expert reports and each section concludes with a series of key points that present a summary of evidence based recommendations for best practice graded according to the quality of that evidence Evidence based Management of Lipid Disorders provides the busy clinician with a unique analysis of the data supporting current therapies and will help the reader formulate effective strategies for treating their own patients **A Clinical Guide for Management of Overweight and**

Obese Children and Adults Caroline M. Apovian,Carine M. Lenders,2006-12-15 While unhealthy diet and sedentary behaviors are second only to smoking as the leading preventable cause of death in the U S less than 45 percent of adult and pediatric obese patients received any prior advice from a physician to lose weight The low rate of identification and

treatment of obesity by physicians can often be attributed to lack of *Cardiovascular Care in Patients With HIV* Merle Myerson, Marshall J. Glesby, 2019-03-15 This book provides the most current overview of the evaluation and management of cardiovascular disease in people living with HIV AIDS The text assesses the risk factors associated with cardiovascular disease in HIV AIDS patients and explores the most cutting edge ways to diagnose and treat the specific diseases that are most common for people living with HIV This text takes a well rounded multidisciplinary approach that considers infectious disease and HIV specialists who may have little familiarity with the diagnosis and management of manifest CVD or risk factors as well as those in remote areas where providers may have little or no infrastructure to support optimal care for their patients The text also serves cardiovascular specialists who may not have the expertise in HIV care to meet the unique needs of these patients *Cardiovascular Care for the Patient Living with HIV* is the ultimate resource for not only all infectious disease and HIV specialists but also for cardiologists neurologists vascular surgeons general practitioners nurse practitioners physician s assistants and all other medical professionals who care for people living with HIV

Handbook of Nutrition and Food Carolyn D. Berdanier, 2001-10-30 With a clear and concise format *Handbook of Nutrition and Food* presents the quantitative and qualitative data and information needed by nutritionists dieticians and health care professionals It proceeds from human development to body systems and disease to micro macro nutrients and concludes with nutrition counseling and community nutrition See *Clinical Manual of Total Cardiovascular Risk* Neil R. Poulter, 2008-12-15 Over the last 10 20 years there has been an increasing appreciation of the need to manage individual risk factors for cardiovascular disease CVD in the context of overall cv risk rather than on the basis of the absolute level of any given risk factor This approach has given rise to the misnomer global risk and generated extensive lip service around this more broad minded approach to managing risk factors and the prevention of CVD This short book was devised with the idea of providing a practical summary of the rationale for management based on estimated total CV risk and the various methods associated with so doing Practical issues are addressed including treatment thresholds and targets for the major risk factors on which we routinely intervene and a brief description of the major means of these interventions is provided Whilst a multifactorial approach to CV prevention is logical and reflects the pathophysiological processes which underpin the formation of atherosclerosis the evidence base to guide practice using estimated CV risk global risk as a threshold for intervention is essentially non existent Meanwhile pending supportive evidence from randomized trials practical pragmatic and cost effective approaches to preventing CVD which is the current biggest contributor to global mortality and burden of disease is urgently required The hope is that this book may make a small contribution toward reducing the horrendous burden which CVD currently imposes on the world
