Department of Commerce. Office of Technical Services, 1962-06 *Research in Education*, 1974 English Journal, 1994 *The Writing Center Director's Resource Book* Christina Murphy, Byron Stay, 2012-11-12 The Writing Center Director s Resource Book has been developed to serve as a guide to writing center professionals in carrying out their various roles duties and responsibilities It is a resource for those whose jobs not only encompass a wide range of tasks but also require a broad knowledge of multiple issues The volume provides

information on the most significant areas of writing center work that writing center professionals both new and seasoned are likely to encounter. It is structured for use in diverse institutional settings providing both current knowledge as well as case studies of specific settings that represent the types of challenges and possible outcomes writing center professionals may experience. This blend of theory with actual practice provides a multi-dimensional view of writing center work. In the end, this book serves not only as a resource but also as a guide to future directions for the writing center which will continue to evolve in response to a myriad of new challenges that will lie ahead.

Landmark Essays on Writing Centers Christina Murphy, Joe Law, 2013-10-18. This collection introduces the reader to the ideas that have shaped writing center theory and practice. The essays have been selected not only for the insight they offer into issues but also for their contributions to writing center scholarship. These papers help to chart the legitimization of writing centers by providing both a history and an examination of the philosophies, praxis, and politics that have defined this emerging field. They demonstrate the ways a clearer profile of the discipline has emerged from the research and reflection of writers like those represented here. This volume charts the emergence of writing centers and the growing recognition of their contributions, roles, and importance. As a nascent discipline, writing centers reflect the concerns with marginality and with finding a respected place in the academy that characterize any new field of academic inquiry. Practice and research concomitantly. Professionals in these fields seek standing within the academy and a way of defining and validating their contributions to the educational process.

Contemporary writing center theorists look to interdisciplinary and multidisciplinary investigations to interpret the work they do and to clarify their aims to the academy at large. Their work employs a variety of philosophical perspectives ranging from sociolinguistics to psychoanalytic theory to show the complex nature and potential of writing center interactions. The idea has now become the multidimensional realities of the writing center within the academy and within society as a whole. What its role will be in future redefinitions of the educational process, how that role will be negotiated and evaluated, and how professionals will shape educational values will constitute the future landmark directions and essays on writing center theory and practice.

Resources in Education, 1998 **Daily Graphic** Yaw Boadu-Ayeboafah, 2006-03-14 **The Idea of a Writing Laboratory** Neal Lerner, 2009-07-09. The Idea of a Writing Laboratory is a book about possibilities about teaching and learning to write in ways that can transform both teachers and students. Author Neal Lerner explores higher education's rich history of writing instruction in classrooms, writing centers, and science laboratories. By tracing the roots of writing and science educators' recognition that the method of the lab hands-on student activity is essential to learning, Lerner offers the hope that the idea of a writing laboratory will be fully realized more than a century after both fields began the experiment. Beginning in the late nineteenth century, writing instructors and science teachers recognized that mass instruction was inadequate for a burgeoning non-traditional student population and that experimental or laboratory methods could prove to be more effective. Lerner traces the history of writing instruction via laboratory methods and examines its successes and

failures through case studies of individual programs and larger reform initiatives Contrasting the University of Minnesota General College Writing Laboratory with the Dartmouth College Writing Clinic for example Lerner offers a cautionary tale of the fine line between experimenting with teaching students to write and curing the students of the disease of bad writing The history of writing within science education also wends its way through Lerner's engaging work presenting the pedagogical origins of laboratory methods to offer educators in science in addition to those in writing studies possibilities for long sought after reform The Idea of a Writing Laboratory compels readers and writers to don those white coats and safety glasses and discover what works and asserts that teaching writing as an experiment in what is possible as a way of offering meaning making opportunities for students no matter the subject matter is an endeavor worth the struggle
