Q12 Identify the control measures needed to reduce the risk to workers (8)

A12 The control measures needed to reduce the risk to workers include:-

- the detection of underground services by using plans or cable/pipe detectors
- supporting the sides of the excavation by shoring or benching
- storing materials and spoil away from edge of the excavation
- providing means to prevent vehicles falling into the excavation such as stop blocks
- providing guard-rails and barriers to prevent people falling into the excavation
- providing means of support for adjacent structures to prevent collapse
- providing safe means of access/egress into the excavation
- testing for noxious fumes and providing ventilation if necessary
- using pumps to protect against flooding
- taking precautions to safeguard the workers from biological hazards or those caused by the presence of contaminated ground
- arranging for the excavation to be inspected at regular intervals by a competent person

Q22 Outline a hierarchy of measures for controlling exposures to hazardous substances. **(10)**

A22 The various stages of the usual hierarchy of risk controls are underlined in this answer.

Elimination or substitution is the best and most effective way of avoiding a severe hazard and its associated risks. Elimination occurs when a process or activity is totally abandoned because the associated risk is too high. Substitution describes the use of a less hazardous form of the substance. There are many examples of substitution, such as the use of water-based rather
