Muller, 2018-02-06 How the obsession with quantifying human performance threatens our schools medical care businesses and government Today organizations of all kinds are ruled by the belief that the path to success is quantifying human performance publicizing the results and dividing up the rewards based on the numbers But in our zeal to instill the evaluation process with scientific rigor we've gone from measuring performance to fixating on measuring itself The result is a tyranny of metrics that threatens the

quality of our lives and most important institutions In this timely and powerful book Jerry Muller uncovers the damage our obsession with metrics is causing and shows how we can begin to fix the problem Filled with examples from education medicine business and finance government the police and military and philanthropy and foreign aid this brief and accessible book explains why the seemingly irresistible pressure to quantify performance distorts and distracts whether by encouraging gaming the stats or teaching to the test That s because what can and does get measured is not always worth measuring may not be what we really want to know and may draw effort away from the things we care about Along the way we learn why paying for measured performance doesn t work why surgical scorecards may increase deaths and much more But metrics can be good when used as a complement to rather than a replacement for judgment based on personal experience and Muller also gives examples of when metrics have been beneficial Complete with a checklist of when and how to use metrics The Tyranny of Metrics is an essential corrective to a rarely questioned trend that increasingly affects us all **Normal**

Schainker,Jessica Nelson,Samantha Charm,Cleve Redmond,Richard Spoth,2022-12-19 Typical life circumstances for military families may impact their participation in prevention programs yet little is known about what factors influence their participation The current study examined predictors of attendance in the Strengthening Families Program For Parents and Youth 10 14 for Military Families a universal in person program designed to improve family functioning and reduce youth substance misuse and other problem behaviors Participants included 159 parent child dyads randomly selected to be

offered the 7 week family program Analyses examined demographic characteristics deployment experiences time spent waiting for the program to begin and psychosocial functioning as predictors of attendance in a series of regression models Of the 39 percent of families that attended any program sessions the majority 71 percent attended at least four of the seven sessions Attendance varied significantly across the geographic areas in which groups were held Prior service utilization youth conduct problem behavior parental history of deployment and family conflict were each positively associated with attendance whereas parent tobacco use was negatively associated with attendance These results highlight the challenges in recruiting military families into in person prevention programs and suggest that extra efforts may be needed to engage families that do not perceive that they have a need for support

### **Proceedings ,1912 Educational Inequality and**

**School Finance** Bruce D. Baker,2021-02-09 In Educational Inequality and School Finance Bruce D Baker offers a comprehensive examination of how US public schools receive and spend money Drawing on extensive longitudinal data and numerous studies of states and districts he provides a vivid and dismaying portrait of the stagnation of state investment in public education and the continuing challenges of achieving equity and adequacy in school funding Baker explores school finance the school and classroom resources derived from school funding and how and why those resources matter He provides a critical examination of popular assumptions that undergird the policy discourse around school funding notably that money doesn t matter and that we are spending more and getting less and shows how these misunderstandings contribute to our reluctance to increase investment in education at a time when the demands on our educational system are rising Through an introduction to the concepts of adequacy equity productivity and efficiency Baker shows how these can be used to evaluate policy reforms He argues that we know a great deal about the role and importance of money in schools the mechanisms through which money matters for student outcomes and the trade offs involved and he presents a framework for designing and financing an equitable and adequate public education system with balanced and stable sources of revenue Educational Inequality and School Finance takes an issue all too often relegated to technical experts and makes it accessible for broader public empowerment and engagement
